Other brand and product names are trademarks and/or registered trademarks of their respective holders.

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

NOTE: This symbol where placed in the Service Guide designates a component that should be recycled according to the local regulations.

Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

Table of Contents

System Specifications

Features

Below is a brief summary of the computer's many features:

NOTE: Items denoted with an (*) are only available for selected models.

Operating System

- Genuine Windows® 7 Home Premium 64-bit
- Genuine Windows® 7 Home Basic 64-bit

Platform

Aspire 5252

- AMD V Series processor V140 (512 KB L2 cache, 2.30 GHz, DDR3 1066 MHz, 25 W)
- AMD M880G Chipset

Aspire 5552/Aspire 5552G

- AMD Phenom™ II quad-core mobile processor N950 (2 MB L2 cache, 2.1 GHz, DDR3 1333 MHz, 35 W)
- AMD Phenom™ II triple-core mobile processor N850 (1.5 MB L2 cache, 2.20GHz, DDR3 1333 MHz, 35 W)
- AMD Turion™ II dual-core mobile processor P540 (2 MB L2 cache, 2.40GHz, DDR3 1066 MHz, 25 W)
- AMD Athlon™ II dual-core processor P340/N350 (1 MB L2 cache, 2.20/2.40-GHz, DDR3 1066 MHz, 25/35 W)
- AMD M880G Chipset

System Memory

- Dual-channel DDR3 SDRAM support:
 - Up to 4 GB of DDR3 system memory, upgradable to 8 GB using two soDIMM modules

Display

- 15.6" HD 1366 x 768 pixel resolution, high-brightness (200-nit) Acer CineCrystal™ TFT LCD
- 16:9 aspect ratio

Graphics

Aspire 5252/5552

- ATI Radeon™ HD 4250 Graphics with 256 MB of dedicated system memory, supporting Unified Video Decoder 2 (UVD2), OpenGL® 2.0, OpenEXR High Dynamic-Range (HDR) technology, Shader Model 4.1, Microsoft® DirectX® 10.1
- Dual independent display support
- 16.7 million colors
- External resolution / refresh rate:
 - VGA port up to 2456 x 1536: 60 Hz
 - HDMI™ port up to 1920 x 1080: 60 Hz
- MPEG-2/DVD decoding
- WMV9 (VC-1) and H.264 (AVC) decoding
- HDMI™ (High-Definition Multimedia Interface) with HDCP (High-bandwidth Digital Content Protection) support

Aspire 5552G

- ATI Mobility Radeon™ HD 5650 with 1024 MB of dedicated DDR3 VRAM, supporting Unified Video Decoder (UVD), OpenEXR High Dynamic-Range (HDR) technology, Shader Model 5.0, Microsoft® DirectX® 11, OpenGL® 3.1, OpenCL™ 1.1
- ATI Mobility Radeon™ HD 5470 with 512 MB of dedicated DDR3 VRAM, supporting Unified Video Decoder (UVD), OpenEXR High Dynamic-Range (HDR) technology, Shader Model 5.0, Microsoft® DirectX® 11, OpenGL® 3.1, OpenCL™ 1.1
- Dual independent display support
- 16.7 million colors
- External resolution / refresh rates:
 - VGA port up to 2048 x 1536: 85 Hz
 - HDMI™ port up to 1920 x 1080: 60 Hz
- MPEG-2/DVD decoding
- WMV9 (VC-1) and H.264 (AVC) decoding
- Microsoft® DirectX® Video Acceleration (DXVA) application interface (API)
- HDMI™ (High-Definition Multimedia Interface) with HDCP (High-bandwidth Digital Content Protection) support

Audio

- Built-in Acer mono speaker
- High-definition audio support
- Built-in microphone
- MS-Sound compatible

Storage

- Hard disk drive:
 - 160/250/320/500/640/750 GB or larger
- 2-in-1 card reader, supporting:
 - Secure Digital™ (SD), MultiMediaCard™ (MMC)

Optical Media Drive

- 8X DVD-Super Multi double-layer drive:
 - Read: 24X CD-ROM, 24X CD-R, 24X CD-RW, 8X DVD-ROM, 8X DVD-R, 8X DVD+R, 6X DVD-ROM DL, 6X DVD-R DL, 6X DVD+R DL, 6X DVD-RW, 6X DVD+RW, 5X DVD-RAM
 - Write: 24X CD-R, 16X CD-RW, 8X DVD-R, 8X DVD+R, 4X DVD-R DL, 4X DVD+R DL, 6X DVD-RW, 8X DVD+RW, 5X DVD-RAM

Communication

- Acer Video Conference, featuring:
 - Acer Crystal Eye webcam with 1280 x 1024 resolution
- WLAN:
 - Acer InViLink™ Nplify™ 802.11b/g/n Wi-Fi CERTIFIED™
 - Acer InViLink™ 802.11b/g Wi-Fi CERTIFIED™
 - Supporting Acer SignalUp™ wireless technology
- WPAN:
 - Bluetooth® 2.1+EDR
 - Bluetooth® 3.0+HS
- LAN:
 - Gigabit Ethernet, Wake-on-LAN ready

Privacy Control

- BIOS user, supervisor, HDD passwords
- Kensington lock slot

Dimensions and Weight

- Dimensions
 - 381 (W) x 253 (D) x 25/34 (H) mm 15 x 9.96 x 0.98/1.33 inches)
- Weight
 - 2.6 kg (5.74 lbs.) with 6-cell battery pack

Power Subsystem

ACPI 3.0 CPU power management standard: supports Standby and Hibernation power-saving modes

- Power adapter
 - 3-pin 65 W AC adapter
 - 108 (W) x 46 (D) x 29.5 (H) mm (4.25 x 1.81 x 1.16 inches)
 - 225 g (0.49 lbs.) with 180 cm DC cable
- Battery
 - 48.8 W 4400 mAh 6-cell Li-ion standard battery pack
 - Battery life: 3 hours and 20 minutes
 - ENERGY STAR®

Special Keys and Controls

- Keyboard
 - 103-/104-/107-key Acer FineTip keyboard with independent standard numeric keypad, international language support
- Touchpad
 - Multi-gesture touchpad, supporting two-finger scroll, pinch, rotate, flip
- Media keys
 - Media control keys (printed on keyboard): play/pause, stop, previous, next, volume up, volume down

I/O Interface

- 2-in-1 card reader (SD™, MMC)
- Three USB 2.0 ports
- HDMI™ port with HDCP support
- External display (VGA) port
- Headphone/speaker/line-out jack
- Microphone-in jack
- Ethernet (RJ-45) port
- DC-in jack for AC adapter

Software

- Productivity
 - Acer Backup Manager
 - Acer ePower Management
 - Acer eRecovery Management
 - Adobe® Flash® Player 10
 - Adobe® Reader® 9.1
 - eSobi™
 - Google™ Setup
 - Google Toolbar™
 - Microsoft® Office 2010 preloaded (purchase a product key to activate)
 - Microsoft® Office Starter 2010
 - Norton™ Online Backup
- Security
 - McAfee® Internet Security Suite Trial
 - MyWinLocker® (except China, Hong Kong)
- Multimedia
 - Corel® WinDVD (for models with Windows® 7 Starter and Basic)
 - NTI Media Maker™
- Gaming
 - Oberon GameZone (except US, Canada, Hong Kong, Korea)
 - WildTangent® (US, Canada only)
- Communication and ISP
 - Microsoft® Silverlight™
 - Windows Live™ Essentials - Wave 3.2 (Mail, Photo Gallery, Live™ Messenger, Movie Maker, Writer)

-
- Utilities and tools
 - Acer Accessory Store (Belgium, France, Germany, Italy, Netherlands, Spain, Sweden, UK only)
 - Acer Identity Card
 - Acer Registration
 - Acer Updater
 - eBay® shortcut 2009 (Canada, France, Germany, Italy, Mexico, Spain, UK, US only)
 - Netflix shortcut (US only)

Optional Items

- 1/2/4 GB DDR3 1066 MHz soDIMM module
- 6-cell Li-ion battery pack
- 3-pin 65 W AC adapter
- External USB 56K modem

Warranty

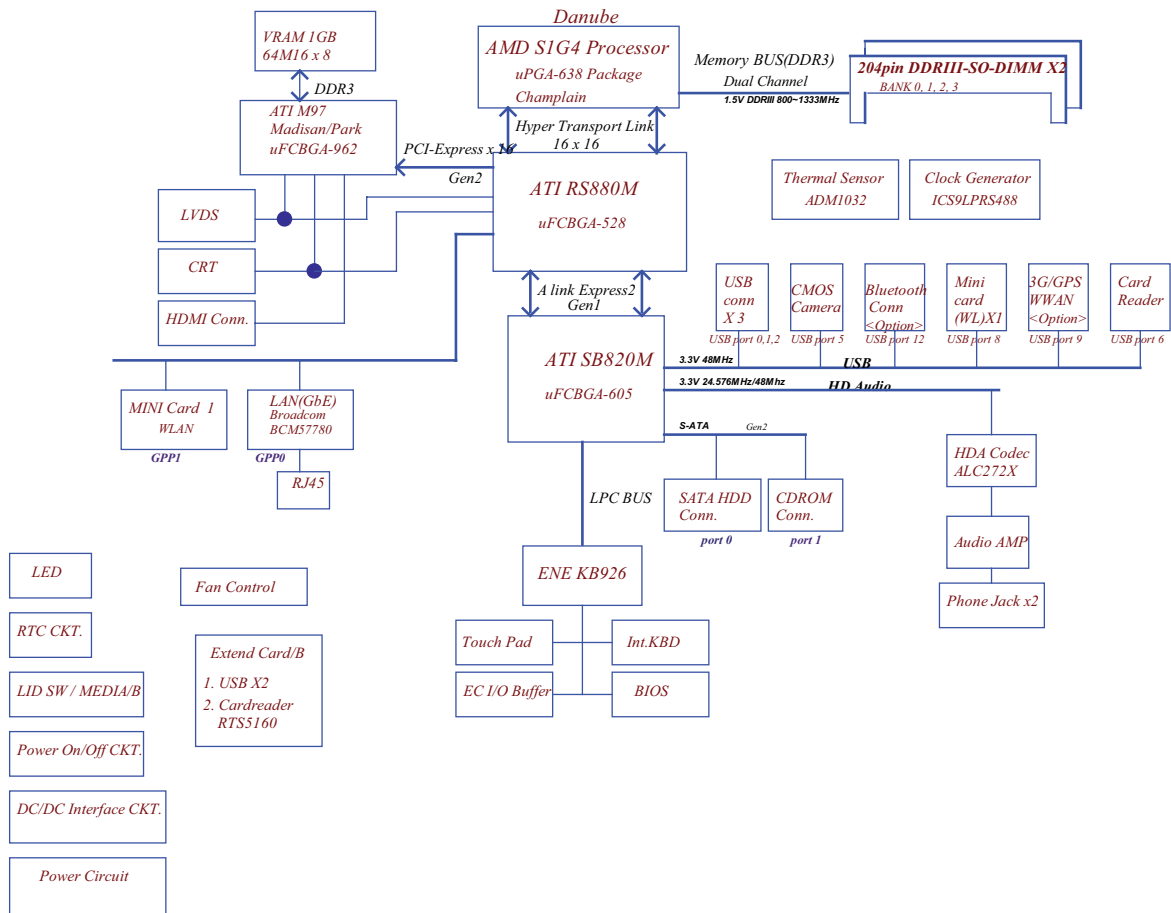

- One-year International Travelers Warranty (ITW)

Environment

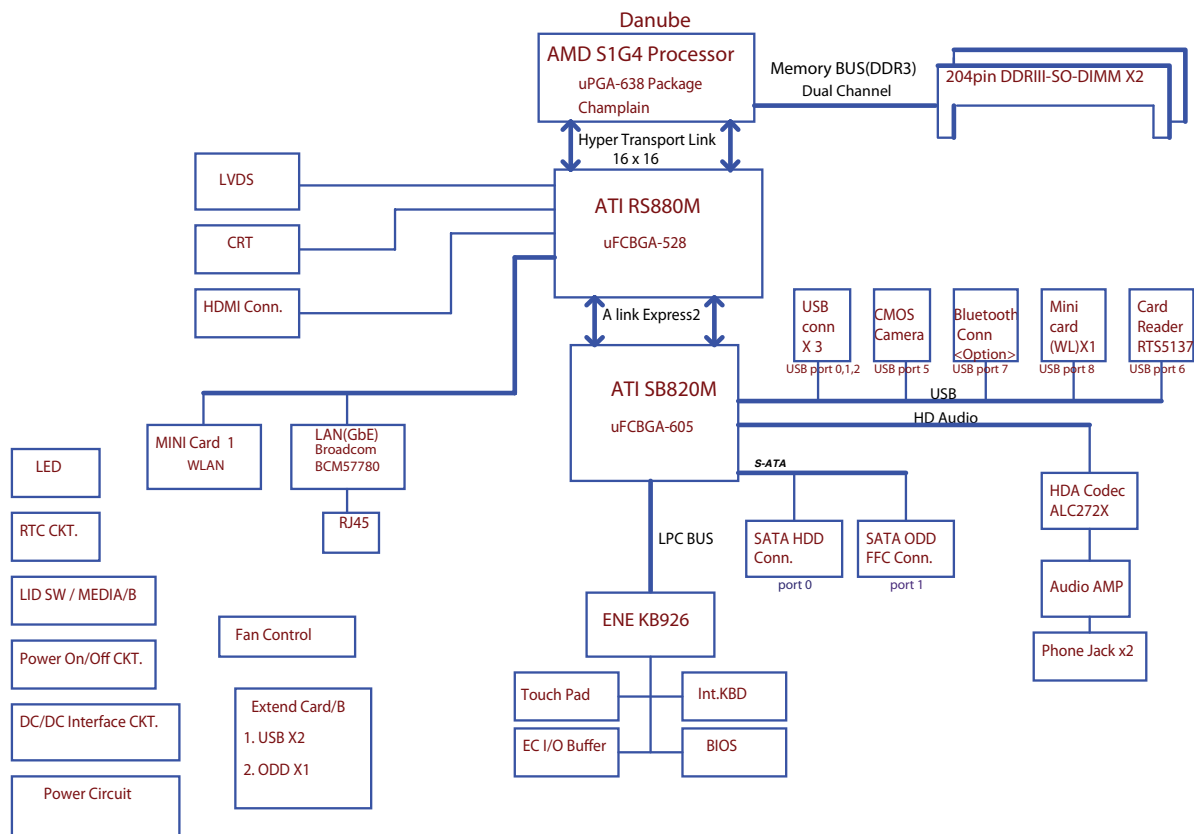

- Temperature:
 - Operating: 5°C to 35°C
 - Non-operating: -20°C to 65°C
- Humidity (non-condensing):
 - Operating: 20% to 80%
 - Non-operating: 20% to 80%

System Block Diagram

Discrete Model

UMA Model

Your Acer Notebook tour

Front View

No.	Icon	Item	Description
1		Acer Crystal Eye webcam	Web camera for video communication (for selected models).
2		Display screen	Also called Liquid-Crystal Display (LCD), displays computer output.
3		HDD	Indicates when the hard disk drive is active.
		Communication indicator	Indicates the computer's wireless connectivity device status.
4		Power button	Turns the computer on and off.
5		Keyboard	For entering data into your computer.
6		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.

No.	Icon	Item	Description
7		Power	Indicates the computer's power status.
		Battery	Indicates the computer's battery status. 1. Charging: The light shows amber when the battery is charging. 2. Fully charged: The light shows blue when in AC mode.
8		Click buttons (left and right)	The left and right buttons function like the left and right mouse buttons.
9		Palmrest	Comfortable support area for your hands when you use the computer.
10		Speakers	Left and right speakers deliver stereo audio output.
11		Microphone	Internal microphone for recording sound.
		2-in-1 card reader	Accepts Secure Digital (SD), MultiMediaCard (MMC). Note: Push to remove/install the card. Only one card can operate at any given time.

NOTE: The 2-in1 card reader will be on the front left for UMA models and on the front right for discrete models.

Rear View

No.	Icon	Item	Description
1		Battery bay	Houses the computer's battery pack.

Left View

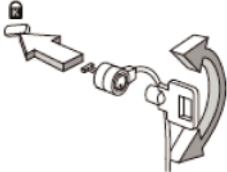

No.	Icon	Item	Description
1		DC-in jack	Connects to an AC adapter
2		External display (VGA) port	Connects to a display device (e.g. external monitor, LCD projector).
3		Ethernet (RJ-45) port	Connects to an Ethernet 10/100/1000-based network.

No.	Icon	Item	Description
4	HDMI	HDMI	Connect to HDMI devices
5		USB 2.0 ports	Connect to USB 2.0 devices (e.g. USB mouse, USB camera).
6		Microphone-in jack	Accepts input from external microphones.
		Headphones/speaker/line-out jack	Connects to audio line-out devices (e.g. speakers, headphones).

Right View

No.	Icon	Item	Description
1		USB 2.0 ports	Connect to USB 2.0 devices (e.g. USB mouse, USB camera).
2		Optical drive	Internal optical drive; accepts CDs or DVDs.
3		Optical disk access indicator	Lights up when the optical drive is active.
4		Optical drive eject button	Ejects the optical disk from the drive.
5		Emergency eject hole	Ejects the optical drive tray when the computer is turned off. Note: Insert a paper clip into the emergency eject hole to eject the optical drive tray when the computer is off.
6		Kensington lock slot 	Connects to a Kensington-compatible computer security lock. Note: Wrap the computer security lock cable around an immovable object such as a table or handle of a locked drawer. Insert the lock into the notch and turn the key to secure the lock. Some keyless models are also available.

Base View

No.	Icon	Item	Description
1		Battery bay	Houses the computer's battery pack.
2		Battery release latch	Releases the battery for removal.
3		Hard disk bay	Houses the computer's hard disk (secured with screws).
		Memory compartment	Houses the computer's main memory.
4		Battery lock	Locks the battery in position.

Indicators

The computer has several easy-to-read status indicators.

Icon	Function	Description
	Power	Indicates the computer's power status.
	Battery	Indicates the computer's battery status. NOTE: 1. Charging: The light shows amber when the battery is charging. 2. Fully charged: The light shows green when in AC mode.
	HDD	Indicates when the hard disk drive is active.
	Communication indicator	Indicates the computer's wireless connectivity device status.

Touchpad Basics

The following items show you how to use the Touchpad:

- Move your finger across the Touchpad (1) to move the cursor.
- Press the left (2) and right (3) buttons located beneath the Touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the Touchpad is the same as clicking the left button.

Function	Left Button (2)	Right Button (3)	Main Touchpad (1)
Execute	Quickly click twice.		Tap twice (at the same speed as double-clicking a mouse button).
Select	Click once.		Tap once.
Drag	Click and hold, then use finger on the Touchpad to drag the cursor.		Tap twice (at the same speed as double-clicking a mouse button); rest your finger on the Touchpad on the second tap and drag the cursor.
Access context menu		Click once.	

NOTE: When using the Touchpad, keep it - and your fingers - dry and clean. The Touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping too hard will not increase the Touchpad's responsiveness.

Using the Keyboard

The keyboard has full-sized keys and an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock Keys and embedded numeric keypad

The keyboard has two lock keys which you can toggle on and off.

Lock key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Scroll Lock	When Scroll Lock is on, the contents of a text window scroll without moving the cursor.
Num Lock	When Num Lock is on, the embedded keypad is in numeric mode.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

Key	Description
 Windows key	<p>Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of functions:</p> <ul style="list-style-type: none"><  >: Open or close the Start menu<  > + <D>: Display the desktop<  > + <E>: Open Windows Explore<  > + <F>: Search for a file or folder<  > + <G>: Cycle through Sidebar gadgets<  > + <L>: Lock your computer (if you are connected to a network domain), or switch users (if you're not connected to a network domain)<  > + <M>: Minimizes all windows<  > + <R>: Open the Run dialog box<  > + <T>: Cycle through programs on the taskbar<  > + <U>: Open Ease of Access Center<  > + <X>: Open Windows Mobility Center<  > + <BREAK>: Display the System Properties dialog box<  > + <SHIFT+M>: Restore minimized windows to the desktop<  > + <TAB>: Cycle through programs on the taskbar by using Windows Flip 3-D<  > + <SPACEBAR>: Bring all gadgets to the front and select Windows Sidebar<CTRL> + <  > + <F>: Search for computers (if you are on a network)<CTRL> + <  > + <TAB>: Use the arrow keys to cycle through programs on the taskbar by using Windows Flip 3-D <p>Note: Depending on your edition of Windows 7, some shortcuts may not function as described.</p>
 Application key	<p>This key has the same effect as clicking the right mouse button; it opens the application's context menu.</p>

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the <Fn> key before pressing the other key in the hotkey combination.

Hotkey	Icon	Function	Description
<Fn> + <F3>		Communication key	Enables / disables the computer's communication devices. (Communication devices may vary by configuration.)
<Fn> + <F4>		Sleep	Puts the computer in Sleep mode.
<Fn> + <F5>		Display toggle	Switches display output between the display screen, external monitor (if connected) and both.
<Fn> + <F6>		Display Off	Turns the display screen backlight off to save power. Press any key to return.
<Fn> + <F7>		Touchpad toggle	Turns the internal touchpad on and off.
<Fn> + <F8>		Speaker toggle	Turns the speakers on and off.
<Fn> + <▷>		Brightness up	Increases the screen brightness.
<Fn> + <◁>		Brightness down	Decreases the screen brightness.
<Fn> + <△>		Volume up	Increases the sound volume.
<Fn> + <▽>		Volume down	Decreases the sound volume.
<Fn> + <Home>		Play/Pause	Play or pause a selected media file.
<Fn> + <Pg Up>		Stop	Stop playing the selected media file.
<Fn> + <Pg Dn>		Previous	Return to the previous media file.
<Fn> + <End>		Next	Jump to the next media file.

Memory controller	AMD DDRIII Memory controller
Memory size	Up to 8GB maximum
DIMM socket number	2
Supports memory size per socket	512MB/1GB/2GB/4GB
Supports maximum memory size	Up to 8GB
Supports DIMM type	DDRIII SO-DIMM
Supports DIMM Speed	Up to 1333M/Ts
Support DIMM voltage	1.5V
Supports DIMM package	204-pin DDRIII SO-DIMM

Memory Combinations

Slot 1	Slot 2	Total Memory
0MB	1024MB	1024MB
0MB	2048MB	2048MB
0MB	4096MB	4096MB
1024MB	0MB	1024MB
1024MB	1024MB	2048MB
1024MB	2048MB	3072MB
2048MB	0MB	2048MB
2048MB	1024MB	3072MB
2048MB	2048MB	4096MB
2048MB	4096MB	6144MB
4096MB	4096MB	8192MB

NOTE: Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. In the above table, the configuration of slot 1 and slot 2 could be reversed.

LAN Interface

Item	Specification
LAN Chipset	Broadcom 57780KMLG
Support LAN protocol	IEEE 802.3 / 802.3u / 802.3ab / 802.1p
LAN connector type	RJ-45
LAN connector location	Left side
Features	<ul style="list-style-type: none">• Integrated 10/100/10000BASE-T transceiver• Automatic MDI crossover function• PCIe V1.1 compliant• 10/100/10000BASE-T full -duplex/half -duplex MAC• Receive side scaling(RSS) for multicore processors• Complies with IEEE 802.3, 802.3u, 802.3ab, and 802.1p• Wake on LAN (WOL) support meeting the ACPI requirements• Statistics for SNMP MIB II, Ethernet-like MIB, and Ethernet MIB (IEEE 802.3z, Clause 30)• Self-boot feature, utilizing smaller EEPROM size with ability to use on-chip memory• Supports iSCSI boot• PCI Express CLKREQ support• Integrated switching regulator for improved power consumption• IPv4 and IPv6 large send off load and checksum off load (LSO/TCO)

Wireless Module 802.11b/g/n

Item	Specification
Chipset	Atheros HB93/HB95/ HB97, Broadcom 943225/43225/ 4313/ 4312, RTL8192
Data throughput	11~54 Mbps, up to 270 Mbps for Draft-N
Protocol	802.11 b+g, Draft-N
Interface	PCI bus (mini PCI socket for wireless module)

Bluetooth Interface

Item	Specification
Chipset	Atheros AR3011/ Broadcom BCM2070/ Broadcom BCM2046
Data throughput	TX 1.2Mbps/sec RX 1.2Mbps/sec
Protocol	3.0+HS
Interface	USB 2.0
Connector type	SM08B-SURS-TF/JST SM06B-XSRK-ETB/SM08B-SURS-TF

3G (Not available in this model)

Power Specification

Legacy Mode	ACPI Mode	Power Management
Off	Mech. Off (G3)	All devices in the system are turned off completely.
	Soft Off (G2/S5)	OS initiated shutdown. All devices in the system are turned off completely.
On	Working (G0/S0)	Individual devices such as the CPU and hard disk may be power managed in this state.
	S3 Sleeping State	CPU set power down VGA suspend PCMCIA suspend Audio power down Hard Disk power down CD-ROM power down Super I/O low power mode
	S4 Sleeping State	Also called Hibernate state. The system saves all system states and data onto disk prior to powering off the whole system.

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Navigating the BIOS Utility

There are five menu options: Information, Main, Security, Boot, and Exit.

Follow these instructions:

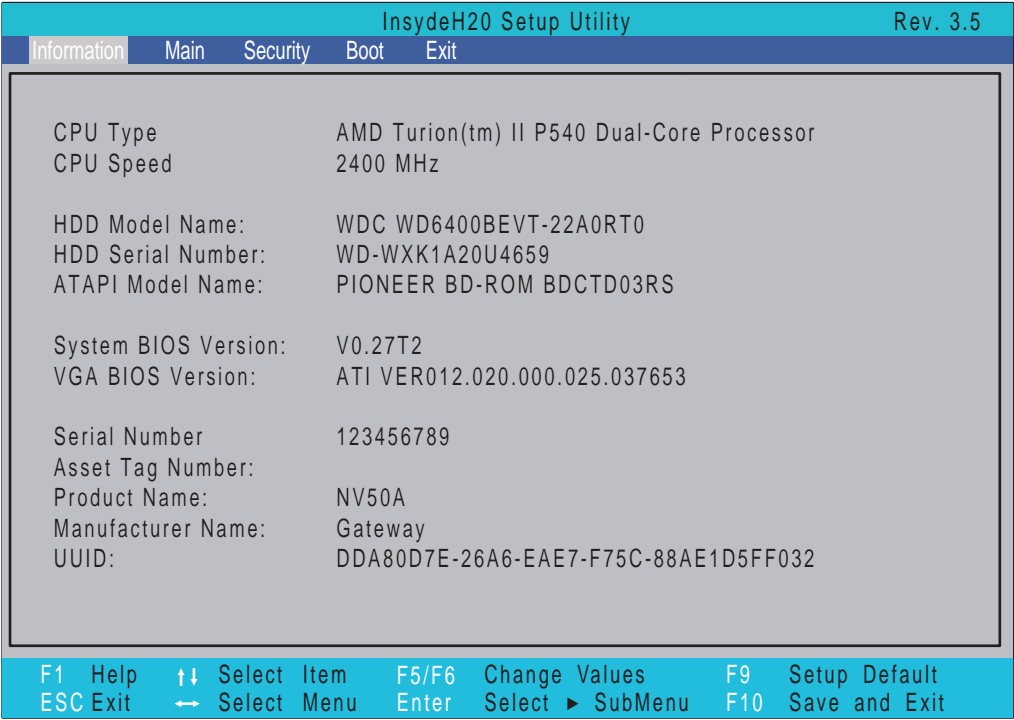

- To choose a menu, use the left and right arrow keys.
- To choose an item, use the up and down arrow keys.
- To change the value of a parameter, press **F5** or **F6**.
- Press **Esc** while you are in any of the menu options to go to the Exit popup dialog.
- In any menu, you can load default settings by pressing **F9**. You can also press **F10** to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models.**

Aspire AS5552/AS5552G BIOS

Information

The Information screen displays a summary of the computer hardware information.

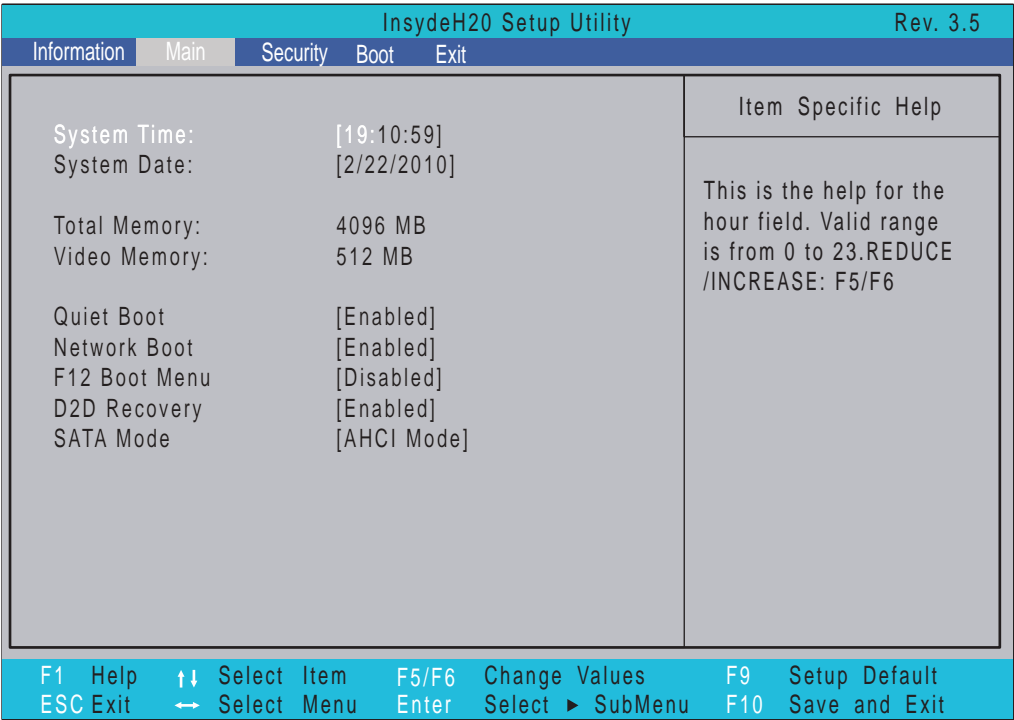

NOTE: The screen above is for your reference only. Actual values may differ according to model.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description
CPU Type	This field shows the CPU type and speed of the system.
CPU Speed	This field shows the speed of the CPU.
HDD Model Name	This field shows the model name of HDD installed on the system.
HDD Serial Number	This field displays the serial number of HDD installed on the system.
ATAPI Model Name	This field shows the model name of the Optical device installed in the system.
System BIOS Version	Displays system BIOS version.
VGA BIOS Version	This field displays the VGA firmware version of the system.
Serial Number	This field displays the serial number of this unit.
Asset Tag Number	This field displays the asset tag number of the system.
Product Name	This field shows product name of the system.
Manufacturer Name	This field displays the manufacturer of this system.
UUID	Universally Unique Identifier (UUID) is an identifier standard used in software construction, standardized by the Open Software Foundation (OSF) as part of the Distributed Computing Environment (DCE).

Main

The Main screen allows the user to set the system time and date as well as enable and disable boot options and recovery.

NOTE: The screen above is for your reference only. Actual values may differ.

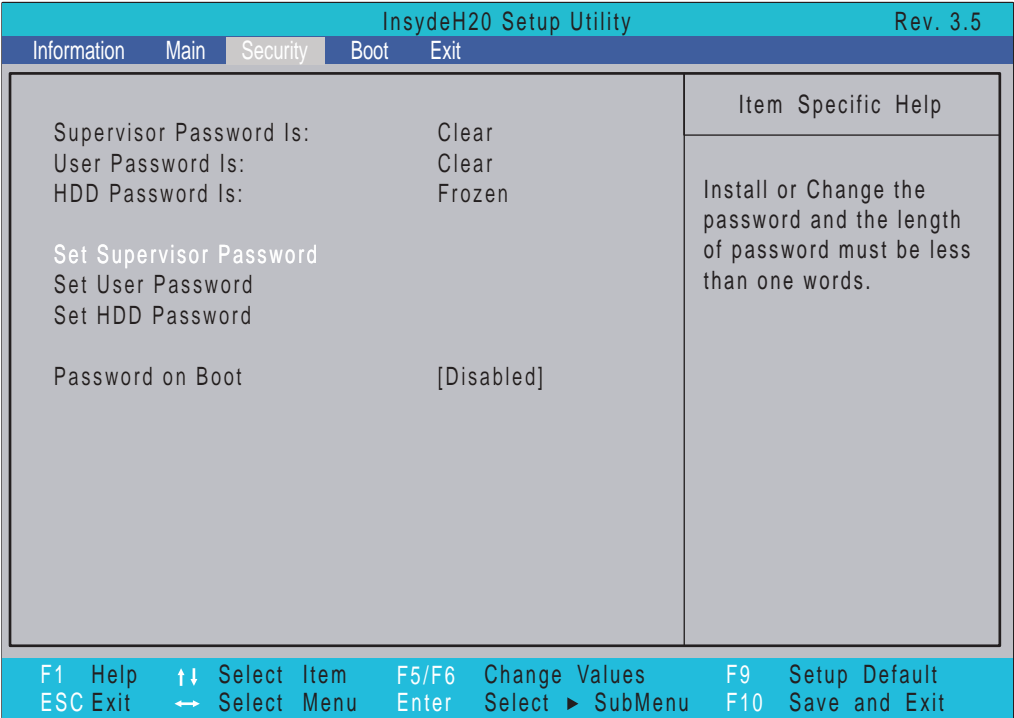

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
System Time	Sets the system time. The hours are displayed with 24-hour format.	Format: HH:MM:SS (hour:minute:second)
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/year)
Total Memory	Displays the total memory available.	N/A
Video Memory	Displays the available memory for Video.	N/A
Quiet Boot	The notebook displays an illustration called the OEM screen during system boot instead of the traditional POST screen that displays the normal diagnostic messages.	Option: Enabled or Disabled
Network Boot	Enables, disables the system boot from LAN (remote server).	Option: Enabled or Disabled
F12 Boot Menu	Enables, disables Boot Menu during POST.	Option: Enabled or Disabled
D2D Recovery	Enables, disables D2D Recovery function. The function allows the user to restore the system to factory defaults.	Option: Enabled or Disabled
SATA Mode	Control the mode in which the SATA controller should operate.	Option: AHCI Mode or IDE Mode

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use.

NOTE: System BIOS does not support Trusted Platform Module (TPM).

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

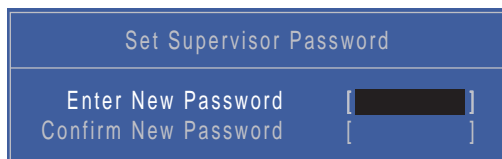

Parameter	Description	Option
Supervisor Password Is	Shows the setting of the supervisor password	Clear or Set
User Password Is	Shows the setting of the user password.	Clear or Set
HDD Password Is	Shows the setting of the HDD password.	Clear , Set, or Frozen
Set Supervisor Password	Press Enter to set the supervisor password. When supervisor password is set, the BIOS Setup Utility is protected from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters except the date and time.	N/A
Set User Password	Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.	N/A
Set HDD Password	Enter HDD Password.	N/A
Password on Boot	Defines whether a password is required or not in order for the computer to finish booting up. CAUTION: It may be difficult to reset the computer once the password is lost. Take care when using this function.	Disabled or Enabled

NOTE: When prompted to enter a password, you have three tries before the system halts. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the **Enter** key. The Set Supervisor Password box appears:

A blue rectangular dialog box titled "Set Supervisor Password". It contains two input fields: "Enter New Password" and "Confirm New Password", each followed by a pair of square brackets [] for text entry.

2. Type a password in the "Enter New Password" field. The password length can not exceed 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

3. Press **Enter**. After setting the password, the computer sets the Supervisor Password parameter to "Set".
4. If desired, you can opt to enable the Password on Boot parameter.
5. When you are done, press F10 to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

1. Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the **Enter** key. The Set Supervisor Password box appears:

A blue rectangular dialog box titled "Set Supervisor Password". It contains three input fields: "Enter Current Password", "Enter New Password", and "Confirm New Password", each followed by a pair of square brackets [] for text entry.

2. Type the current password in the Enter Current Password field and press **Enter**.
3. Press **Enter** twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
4. When you have changed the settings, press F10 to save the changes and exit the BIOS Setup Utility.

Changing a Password

1. Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the **Enter** key. The Set Supervisor Password box appears.

A blue rectangular dialog box titled "Set Supervisor Password". It contains three input fields, each with a label and a pair of square brackets for text entry. The first field is labeled "Enter Current Password", the second "Enter New Password", and the third "Confirm New Password".

Set Supervisor Password	
Enter Current Password	[]
Enter New Password	[]
Confirm New Password	[]

2. Type the current password in the Enter Current Password field and press **Enter**.
3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
4. Press **Enter**. After setting the password, the computer sets the Supervisor Password parameter to "Set".
5. If desired, you can enable the Password on Boot parameter.
6. When you are done, press F10 to save the changes and exit the BIOS Setup Utility.

If the verification is OK, the screen will display as following.

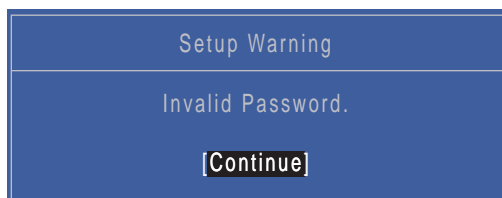

A blue rectangular dialog box titled "Setup Notice". It contains the text "Changes have been saved." and a highlighted button labeled "[Continue]".

Setup Notice
Changes have been saved.
[Continue]

The password setting is complete after the user presses **Enter**.

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

A blue rectangular dialog box titled "Setup Warning". It contains the text "Invalid Password." and a highlighted button labeled "[Continue]".

Setup Warning
Invalid Password.
[Continue]

If the new password and confirm new password strings do not match, the screen will display the following message.

A blue rectangular dialog box titled "Setup Warning". It contains the text "Passwords do not match. Re-enter password." and a highlighted button labeled "[Continue]".

Setup Warning
Passwords do not match. Re-enter password.
[Continue]

Boot

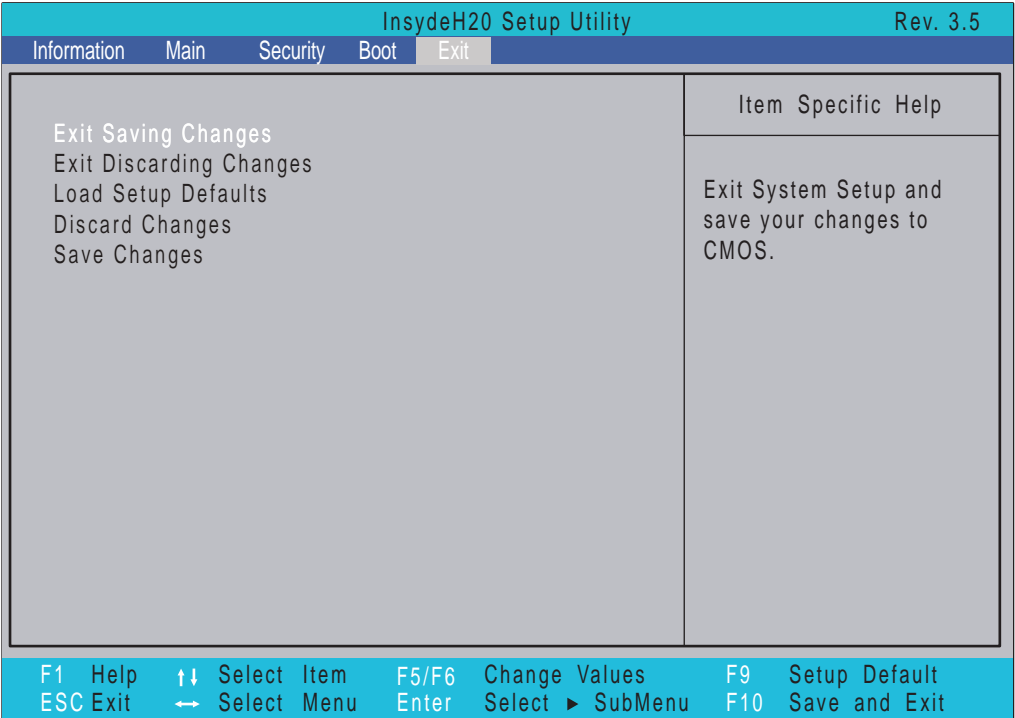

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the USB diskette drives, the onboard hard disk drive and the DVD drive in the module bay.

Select Boot menu to select specific devices to support boot.

ESC	Exit	↔	Select Menu	Enter	Select ► SubMenu	F10	Save and Exit														

Exit

The Exit screen allows you to save or discard any changes you made and quit the BIOS Utility.

The table below describes the parameters in this screen.

Parameter	Description
Exit Saving Changes	Exit System Setup and save your changes to CMOS.
Exit Discarding Changes	Exit utility without saving setup data.
Load Setup Default	Load default values for all Setup items.
Discard Changes	Load previous values for all Setup items.
Save Changes	Save setup data.

BIOS Flash Utilities

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the flash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery Diskette** before you use the flash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the flash.

NOTE: Please use the AC adaptor power supply when you run the flash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

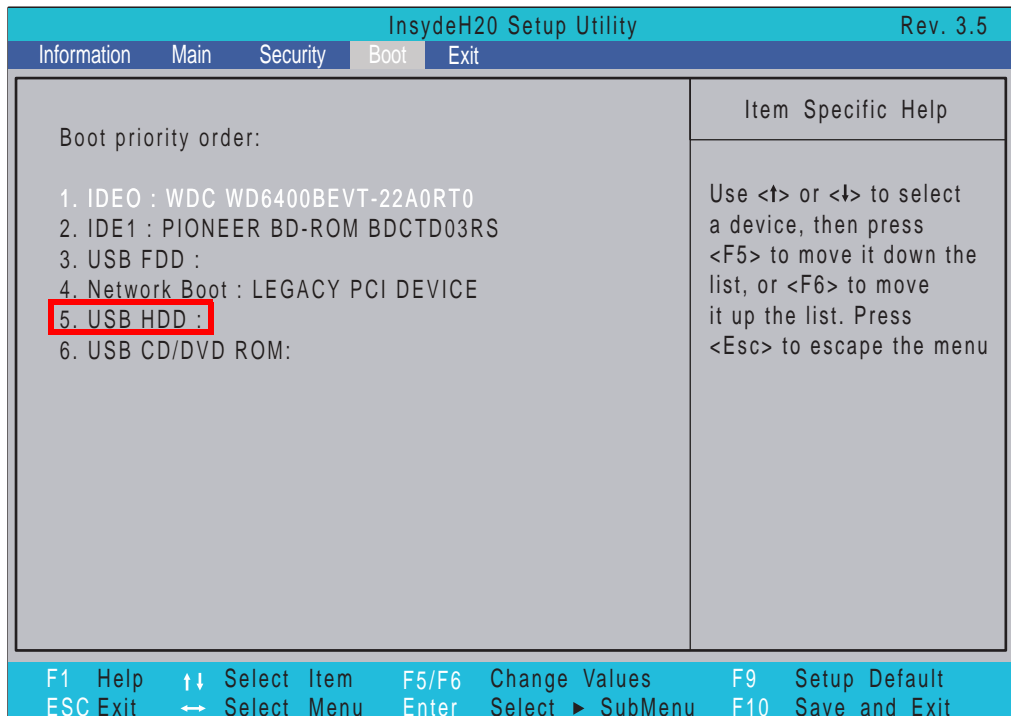

Follow the steps below to run the flash.

1. Prepare a bootable diskette.
2. Copy the flash utilities to the bootable diskette.
3. Then boot the system from the bootable diskette. The flash utility has auto-execution function.

DOS Flash Utility

Perform the following steps to use the DOS Flash Utility:

1. Press F2 during boot to enter the Setup Menu.
2. Select **Boot Menu** to modify the boot priority order, for example, if using USB HDD to Update BIOS, move USB HDD to position 1.

3. Execute the **XEWXX100.BAT** batch file to update BIOS.

The flash process begins as shown.

```
C:\ROMs\XEWxx100\DOS>dir

Volume in drive C is ISS_4GB
Volume Serial Number is 3666-33A4
Directory of C:\ROMs\XEWxx100\DOS

.                <DIR>                06-04-2010  14:31  .
..               <DIR>                06-04-2010  14:31  ..
FLASHIT  EXE           496,574  02-07-2009   2:24  FLASHIT.EXE
XEWXX100 BAT              26  06-04-2010  14:32  XEWXX100.BAT
XEWXX100 FD       2,097,152  06-04-2010  14:31  XEWXX100.FD
          3 file(s)          2,593,752 bytes
          2 dir(s)    2,524,848,128 bytes free

C:\ROMs\XEWxx100\DOS>_
```

```
C:\ROMs\XEWxx101.bat
```

```
C:\ROMs\flashit.exe XEWxx101.FD /all
```

```
Please do not remove the AC power!
```

```
Insyde Flash Utility for InsydeH20  
Version 1.3z
```

```
Initializing
```

```
File loading    100 %
```

```
Current BIOS Model name : BA/JE/HM/SJV5x-DN  
New    BIOS Model name : BA/JE/HM/SJV5x-DN
```

```
Current BIOS version: V1.00  
New    BIOS version: V1.01
```

```
Updating Block at FFEA6000
```

4. In flash BIOS, the message **Please do not remove AC Power Source** displays.

NOTE: If the AC power is not connected, the following message displays.

```
Warning: No AC power connect
```

Plug in the AC power to continue.

5. Flash is complete when the message Flash programming complete displays.

WinFlash Utility

Perform the following steps to use the WinFlash Utility:

1. Double-click the WinFlash executable.
2. Click **OK** to begin the update. A progress screen displays.

Remove HDD/BIOS Password Utilities

This section provides you with details about removing HDD/BIOS password:

Remove HDD Password:

If you key in the wrong HDD password three times, an error is generated.

To reset the HDD password, perform the following steps:

1. After the error is displayed, select the **Enter Unlock Password** option on the screen.

2. An Encode key is generated for unlocking utilities. Note down this key.

3. Execute the **UnlockHD.EXE** file to create the unlock code in DOS Mode using the format **UnlockHD [Encode code]** with the code noted in the previous step, as follows:

UnlockHD 76943488

4. The command generates a password which can be used for unlocking the HDD.

Password: 46548274

5. Key in the password from the previous step to unlock the HDD as shown.

Removing BIOS Passwords

To clear the User or Supervisor passwords, open the DIMM door and use a metal instrument to short the **R334** point.

Cleaning BIOS Passwords

To clean the User or Supervisor passwords, perform the following steps:

1. From a DOS prompt, execute **clnpwd.exe**
2. Press **1** or **2** to clean the desired password shown on the screen.

```
d:\Clnpwd>clnpwd
ACER Clean Password Utility V1.00
Press 1 or 2 to clean any password shown as below
    1.User Password
    2.Supervisor Password

Clean User Password Successfully!
```

The onscreen message determines whether the function is successful or not.

Using Boot Sequence Selector

The Boot Sequence Selector allows the boot order to be changed without accessing the BIOS. To use Boot Sequence Selector, perform the following steps:

1. Enter into DOS.
2. Execute **BS.exe** to display the usage screen.

```
d:\B00TSEQ>bs

*** Boot Sequence Selector Version 0.03 ***
Create by Rockwell Chuang 10/01/2005.

Usage:
      BS [ 1 | 2 | 3 | 4 ]

BS 1 : [ Floppy ] => [ HardDisk ] => [ CD-ROM ] => [ LAN ]
BS 2 : [ HardDisk ] => [ CD-ROM ] => [ LAN ] => [ Floppy ]
BS 3 : [ CD-ROM ] => [ HardDisk ] => [ LAN ] => [ Floppy ]
BS 4 : [ LAN ] => [ Floppy ] => [ HardDisk ] => [ CD-ROM ]

d:\B00TSEQ>
```

3. Select the desired boot sequence by entering the corresponding sequence. For example, enter **BS 2** to change the boot sequence to HDD | CD ROM | LAN | Floppy.

Using DMITools

The DMI (Desktop Management Interface) Tool copies BIOS information to EEPROM to be used in the DMI pool for hardware management.

When the BIOS displays **Verifying DMI pool data** it is checking that the table correlates with the hardware before sending to the operating system (Windows, etc.).

To update the DMI Pool, perform the following steps:

1. Boot into DOS.
2. Execute **dmitools**. The following messages report to screen to confirm completion:
 - `dmitools /r ==>` Read dmi string from bios
 - `dmitools /wm xxxx ==>` Write manufacturer name to eeprom (max. 16 characters)
 - `dmitools /wp xxxx ==>` Write product name to eeprom (max. 16 characters)
 - `dmitools /ws xxxx ==>` Write serial number to eeprom (max. 22 characters)
 - `dmitools /wu xxxx ==>` Write uuid to eeprom
 - `dmitools /wa xxxx ==>` Write asset tag to eeprom (max. 32 characters)

The following examples show the commands and the corresponding output information.

Read DMI Information from Memory

Input:

```
dmitools /r
```

Output:

```
Manufacturer (Type1, Offset04h): Acer
```

```
Product Name (Type1, Offset05h): JE51_DN
```

```
Serial Number (Type1, Offset07h): 01234567890123456789
```

```
UUID String (Type1, Offset08h): xxxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx
```

Write Manufacturer Name to EEPROM

Input:

```
dmitools /wm Packard Bell
```

Write Product Name to EEPROM

Input:

```
dmitools /wp New95
```

Write Serial Number to EEPROM (Create UUID from Intel WFM20.pdf)

Input:

```
dmitools /ws 01234567890123456789
```

Write UUID to EEPROM

Input:

```
dmitools /wu
```

Write Asset Tag to EEPROM

Input:

```
dmitools /wa Acet Asstag
```

NOTE: When using Write options, restart the system to make the new DMI data effective.

Machine Disassembly and Replacement

IMPORTANT: The outside housing and color may vary from the mass produced model.

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

Disassembly Requirements

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- Flat screwdriver
- Philips screwdriver
- Plastic flat screwdriver
- Plastic tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

Pre-disassembly Instructions

Before proceeding with the disassembly procedure, make sure that you do the following:

1. Turn off the power to the system and all peripherals.
2. Unplug the AC adapter and all power and signal cables from the system.

NOTE: Make sure you match the AC adapter with the correct model. **Yellow** for UMA (65W) and **blue** for discrete (90W).

3. Place the system on a flat, stable surface.

Disassembly Process

IMPORTANT: The LCD module cannot be disassembled outside of factory conditions. If any part of the LCD module is faulty, such as the camera, antenna or LCD panel, the whole module must be replaced.

The disassembly process is divided into the following stages:

- External module disassembly
- Main unit disassembly
- LCD module disassembly

The flowcharts provided in the succeeding disassembly sections illustrate the entire disassembly sequence. Observe the order of the sequence to avoid damage to any of the hardware components. For example, if you want to remove the mainboard, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Main Screw List

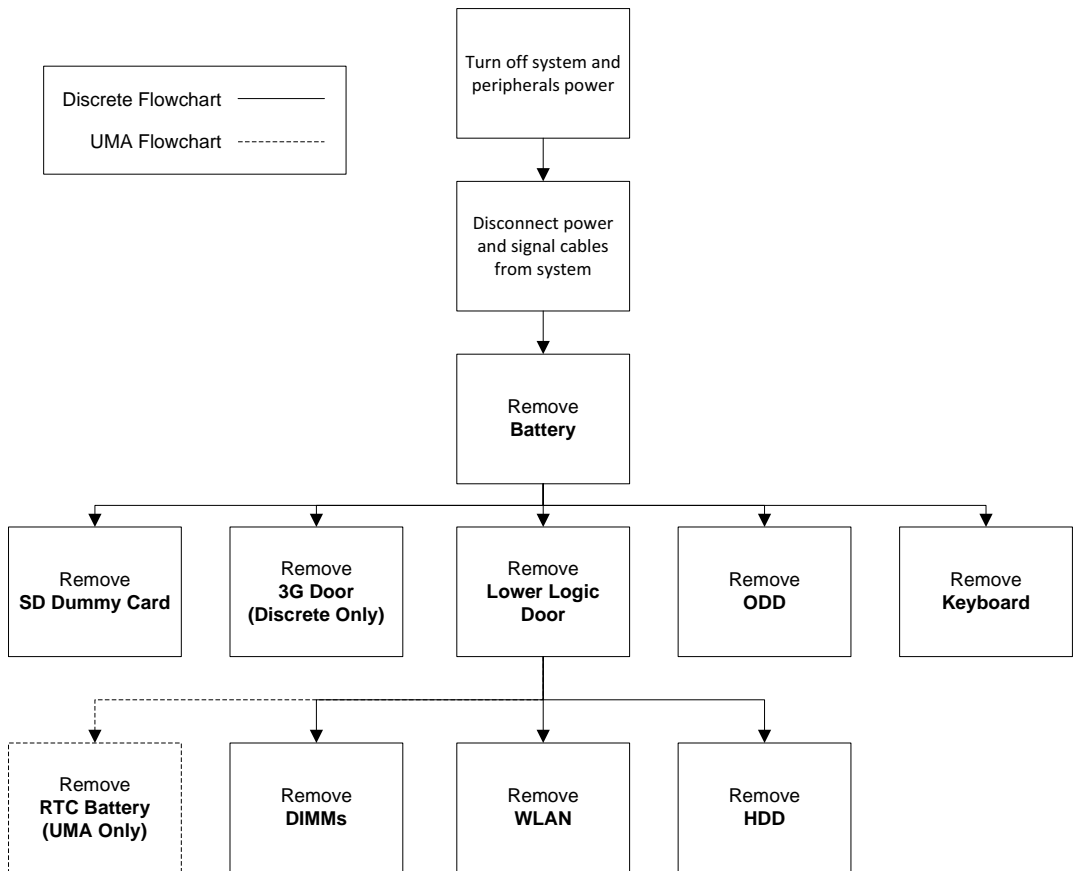

Screw	Quantity	Part Number
M2.5*8	20	86.R4F02.002
M2*3	17	86.R4F02.007
M2.5*5	18	86.R4F02.001
M1.98*3	4	86.R4F02.004
M2.5*6	2	86.R4F02.003
M3*3	4	86.R4F02.005

External Module Disassembly Process

IMPORTANT: The outside housing and color may vary from the mass produced model.

External Modules Disassembly Flowchart

The flowchart below gives you a graphic representation of the external module disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the keyboard, you must first remove the switch board.

Screw List

Step	Screw	Quantity	Part No.
ODD Module	M 2.5*8	1	86.R4F02.002
ODD Bracket	M2*3	2	86.R4F02.007
3G Cover	M2.5*8	1	86.R4F02.002
Lower Logic Door	M2.5*8	2	86.R4F02.002
WLAN Module	M2*3	1	86.R4F02.007
HDD Carrier	M3*3	4	86.R4F02.005

Removing the Battery Pack

1. Turn computer over. Slide the battery lock in the direction shown.

2. Slide and hold the battery release latch to the release position (1), then lift out the battery pack from the main unit (2).

NOTE: The battery has been highlighted with a yellow oval as shown in the above image. Please detach the battery and follow local regulations for disposal.

Removing the SD Dummy Card

1. Push the SD dummy card all the way in to eject it.

2. Pull it out from the slot.

Removing the Keyboard

1. Unlock the six (6) keyboard locks.

2. Pry up the center of the keyboard and rotate it upward away from the upper cover.

3. Turn the keyboard over on to the touchpad area to expose the FPC connector.

-
4. Open the locking latch and disconnect the FPC from the mainboard.

5. Lift the keyboard clear of the upper cover.

Removing the ODD Module

- 1. See “Removing the Battery Pack” on page 49.
- 2. Remove the one (1) screw securing the ODD module.

Step	Size	Quantity	Screw Type
ODD Module	M2.5*8	1	

- 3. Pull the ODD module out from the chassis.

4. Remove the two (2) screws securing the ODD bracket and remove the ODD bracket from the ODD module.

Step	Size	Quantity	Screw Type
ODD Bracket	M2*3	2	

5. Remove the ODD bezel by prying the top edge away and clear of the module.

Removing the Logic Lower Door

1. Remove two (2) screws from the logic lower door.

Step	Size	Quantity	Screw Type
Logic Lower Door	M2.5*8	2	

2. Lift the door beginning from the inner edge as shown.

3. Lift the door clear of the device, exposing the HDD, DIMM, and WLAN modules.

Removing the 3G Cover (Discrete Only)

- 1. Remove one (1) screw from the 3G cover.

Step	Size	Quantity	Screw Type
3G Cover	M2.5*8	1	

- 2. Lift the 3G cover from the right edge first, then remove completely.

Removing the DIMM Module

1. See “Removing the Logic Lower Door” on page 55.
2. Push out the release latches on both sides of the DIMM socket to release the DIMM module.

3. Remove the DIMM module.

4. Repeat steps 2 and 3 for the second DIMM module if present.

Removing the WLAN Module

- 1. See “Removing the Logic Lower Door” on page 55.
- 2. Disconnect the antenna cables from the WLAN module.

NOTE: Cable placement is **Black** to the **MAIN** terminal and **White** to the **AUX** terminal.

- 3. Move the antenna away and remove the one (1) screw to release the WLAN module.

Step	Size	Quantity	Screw Type
WLAN Module	M2*3	1	

-
4. Detach the WLAN module from the WLAN socket.

Removing the HDD Module

1. See “Removing the Logic Lower Door” on page 55.
2. Using plastic tweezers lift the pull tab from the chassis.

3. Using the pull-tab, slide the HDD module in the direction of the arrow to disconnect the interface.

4. Lift the HDD module clear of the HDD bay.

NOTE: To prevent damage to device, avoid pressing down on it or placing heavy objects on top of it.

5. Remove the four (4) screws (two each side) securing the HDD to the carrier.

Step	Size	Quantity	Screw Type
HDD Carrier	M3*3	4	

6. Remove the HDD from the carrier.

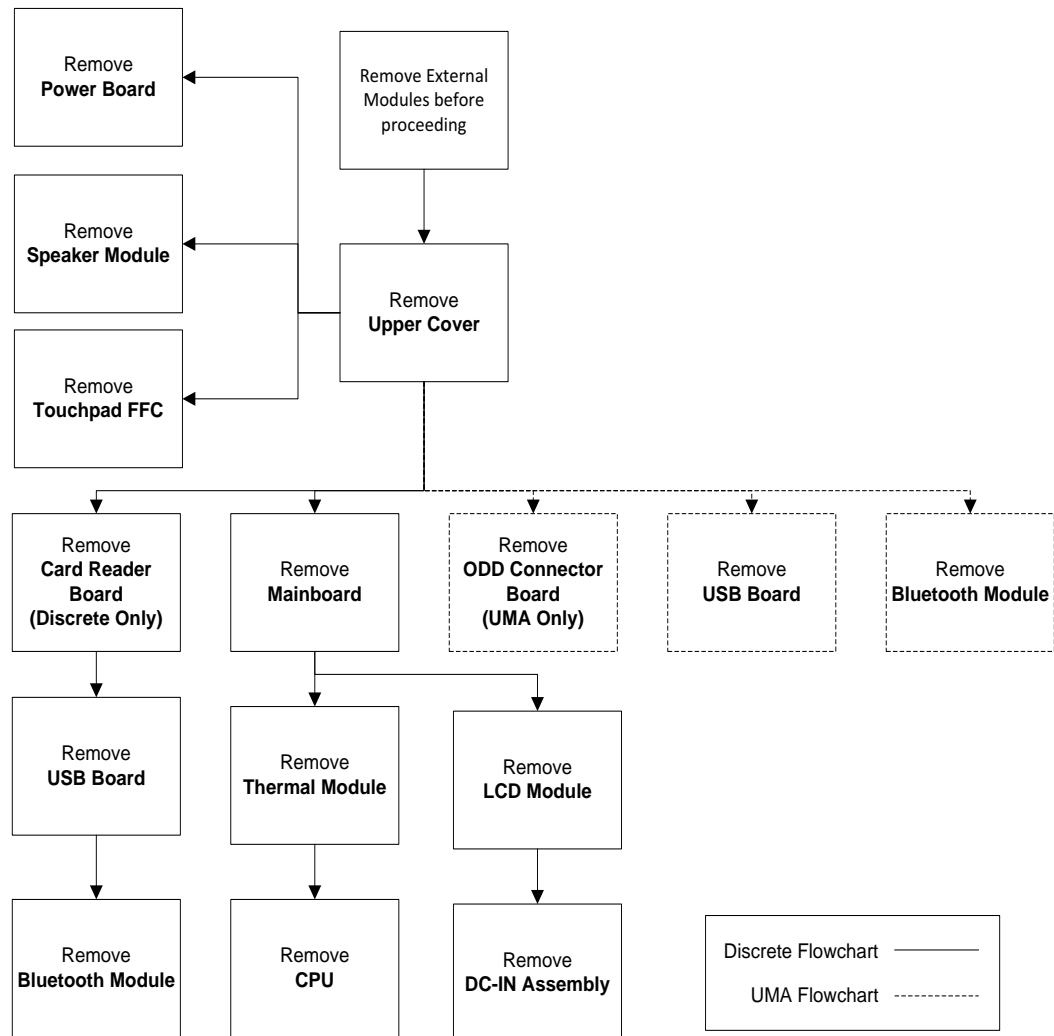

Removing the RTC Battery (UMA Only)

1. See “Removing the Logic Lower Door” on page 55.
2. Using plastic tweezers, lift the RTC battery from mainboard connector.

Main Unit Disassembly Process

Main Unit Disassembly Flowchart

Screw List

Step	Screw	Quantity	Part No.
Lower Cover	M2.5*8	12	86.R4F02.002
	M2*3	4	86.R4F02.007
Upper Cover	M2.5*5	7	86.R4F02.001
Power Board	M2*3	2	86.R4F02.007
Card Reader	M2*3	1	86.R4F02.007
USB Board	M2*3	1	86.R4F02.007
Mainboard	M2.5*5	1	86.R4F02.001
Mainboard (UMA only)	M2.5*5	3	86.R4F02.001
Thermal Module	M1.98*3	4	86.R4F02.004
Thermal Module (Discrete only)	M2.5*5	2	86.R4F02.001
LCD Module	M2.5*8	4	86.R4F02.002

Removing the Upper Cover

NOTE: The upper cover may vary in color depending on the model.

- 1. See “External Module Disassembly Process” on page 48.
- 2. Turn the computer over. Remove the twelve (12) screws on the lower cover and four (4) screws from the battery bay.

Step	Size	Quantity	Screw Type
Lower Cover	M2.5*8 (red callout)	12	
	M2*3 (green callout)	4	

NOTE: The lower cover may vary depending on the model.

3. Turn the computer over and disconnect the following three (3) cables from the mainboard.

4. Unlock and disconnect the power board FFC (A).

5. Disconnect the speaker cable (B).

6. Unlock and disconnect the touchpad FFC (C).

NOTE: Avoid pulling on cables directly to prevent damage to the connectors.

NOTE: Use the pull-tabs on FFCs whenever available to prevent damage.

7. Remove the seven (7) screws from the upper cover as shown.

Step	Size	Quantity	Screw Type
Upper Cover	M2.5*5	7	

8. Starting at the bottom right side of the cover, pry apart the upper and lower covers as shown. Work along the front edge of the casing to the left as shown, then lift the upper cover clear of the lower cover.

Removing the Speaker Module

1. See "Removing the Upper Cover" on page 64.
2. Locate the speaker module on the upper cover as shown.

3. Remove the speaker module cable from the cable guides.

4. Lift the speaker module clear of the device.

Removing the Power Board

NOTE: The power board may vary depending your model.

- 1. See “Removing the Upper Cover” on page 64.
- 2. Remove two (2) screws from the power board.

Step	Size	Quantity	Screw Type
Power Board	M2*3	2	

- 3. Turn the upper cover over and remove the power board cable. Pass the cable through the upper cover as shown.

- 4. Lift the power board from the upper cover.

Removing the Touchpad FFC

IMPORTANT: The touchpad board cannot be removed individually. To replace the touchpad board, replace the entire upper cover.

1. See “Removing the Upper Cover” on page 64.
2. Remove the adhesive tape securing the touchpad FFC to the touchpad board.

3. Lift the FFC to detach the adhesive securing the cable to the upper cover.

4. Release the FFC locking latch and disconnect the touchpad FFC from the connector.

Removing the Card Reader Board (Discrete Only)

1. See “Removing the Upper Cover” on page 64.
2. Remove both pieces of adhesive tape securing the FCC to the lower cover.

3. Unlock the mainboard to card reader cable connector.

4. Lift the FFC to detach the adhesive securing the cable to the lower cover.

5. Remove one (1) screw from the card reader board.

Step	Size	Quantity	Screw Type
Card Reader Board	M2*3	1	

6. Lift the card reader board clear of the device.

Removing the USB Board

1. See “Removing the Upper Cover” on page 64.
2. See “Removing the Card Reader Board (Discrete Only)” on page 71.
NOTE: This procedure is only necessary for discrete models only.
3. Unlock the mainboard to USB cable connector.

4. Lift the FFC to detach the adhesive securing the cable to the lower cover.

5. Remove one (1) screw from the USB board.

Step	Size	Quantity	Screw Type
USB Board	M2*3	1	

NOTE: The location of the bluetooth module may vary depending on your model.

6. Lift the USB board clear of the lower cover.

Removing the Bluetooth Module

1. See “Removing the Upper Cover” on page 64.
2. See “Removing the USB Board” on page 73.
NOTE: This procedure is only necessary for discrete models only.
3. Pry the Bluetooth board from the adhesive.

Discrete

UMA

4. Disconnect the mainboard to Bluetooth cable.

Discrete

UMA

-
5. Lift the Bluetooth cable from the cable guides.

Discrete

UMA

Removing the ODD Connector Board (UMA Only)

1. See "Removing the Upper Cover" on page 64.
2. Unlock and disconnect the ODD FFC from the mainboard.

3. Lift the ODD connector board from the lower cover.

Removing the Mainboard

1. See “Removing the Upper Cover” on page 64.
2. Disconnect the microphone cable from the mainboard.

3. Disconnect the LVDS cable from the mainboard.

4. Remove the LVDS cable and the DC-IN cable from the cable guide.

5. UMA: Remove the four (4) securing screws from the mainboard.
Discrete: Remove the one (1) securing screw from the mainboard.

Discrete

UMA

Step	Size	Quantity	Screw Type
Mainboard	M2.5*5 (red callouts)	1	
(UMA Only)	M2.5*5 (green callouts)	3	

- CAUTION:** Do not remove the mainboard completely. The mainboard is still connected to the chassis.
6. To prevent damage, lay the LCD panel flat and cover the panel as shown.

-
7. Carefully turn the mainboard over and place it on a clean, dust-free surface.

CAUTION: Do not use excessive force when turning the mainboard over as it is still connected to the chassis by the power cable.

8. Disconnect the power cable.

9. Remove the mainboard from the chassis and turn it over.

10. Remove the adhesive tape from the Bluetooth cable.

11. Disconnect the Bluetooth cable from mainboard.

Removing the Thermal Module

- 1. See “Removing the Upper Cover” on page 64.
- 2. Disconnect the fan cable.

Discrete

UMA

- 3. Remove the four (4) securing screws (in reverse numerical order from screw 4 to 1) from the thermal module. In the discrete model, remove two (2) additional screws (in reverse numerical order from screw 6 to 5).

Discrete

UMA

Step	Size	Quantity	Screw Type
Thermal Module	M1.98*3 (red callouts)	4	
(Discrete only)	M2.5*5(green callouts)	2	

4. Carefully lift the thermal module clear of the mainboard.

Discrete

UMA

5. Remove the adhesive tape securing the fan to the heatsink.
NOTE: This procedure is only necessary for UMA models only.

6. Remove the fan from the heatsink.
NOTE: This procedure is only necessary for UMA models only.

Removing the CPU

IMPORTANT: The pins on the underside of the CPU are very delicate. If they are damaged, the CPU may malfunction. Place the CPU on a clean, dry surface when it is not installed.

1. See “Removing the Thermal Module” on page 82.
2. Using a flat-bladed screw driver, rotate the CPU locking screw 180° counter-clockwise as shown.

3. Lift the CPU clear of the socket as shown.

NOTE: Circuit boards >10 cm² have been highlighted with a yellow rectangle as shown in the previous image. Please detach the Circuit board and follow local regulations for disposal.

Removing the LCD Assembly

1. See “Removing the Mainboard” on page 78.
2. Remove the adhesive tape securing the antennas to the lower cover.

3. Free the microphone cable from the cable guides as shown.

Discrete

UMA

4. Free the black and white antenna cables from the cable guides as shown

5. Continue removing the white antenna cable from the cable guides.

6. Continue removing the black antenna cable from the cable guides.

Discrete

UMA

7. Remove four (4) screws from the LCD assembly.

Step	Size	Quantity	Screw Type
LCD Assembly	M2.5*8	4	

8. Remove the LCD assembly from the lower cover.

Removing the DC-IN Assembly

1. See “Removing the LCD Assembly” on page 85.
2. Lift the DC-IN cable from the lower cover.

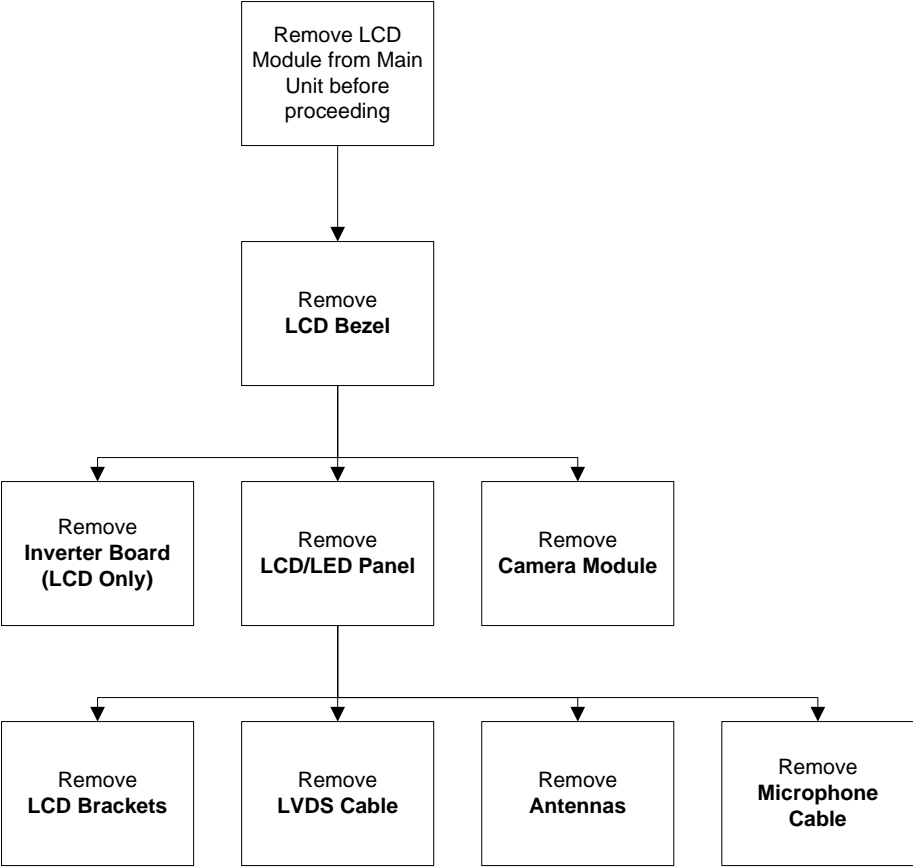

3. Lift the DC-IN assembly from the lower cover.

LCD Module Disassembly Process

LCD Module Disassembly Flowchart

Screw List

Step	Screw	Quantity	Part No.
LCD Bezel	M2.5*6	2	86.R4F02.003
Inverter Board (LCD Only)	M2.5*5	1	86.R4F02.001
LCD/LED Panel	M2.5*5	4	86.R4F02.001
LCD Brackets	M2*3	6	86.R4F02.007

Removing the LCD Bezel

- 1. See “Removing the LCD Bezel” on page 90.
- 2. Remove the two bezel screw caps and screws.

Step	Size	Quantity	Screw Type
LCD Bezel	M2.5*6	2	

- 3. Starting from the bottom edge of the bezel, pry the bezel upwards and away from the panel. Work along the side toward the top of the bezel, prying the covers apart. Continue along the top edge and down the other side to remove the bezel.

NOTE: If necessary, use a pry to lift up the outside edges of the bezel.

Removing the Camera Module

1. See “Removing the LCD Bezel” on page 90.
2. Locate the camera module at the top of the LCD module and disconnect the camera cable.

3. Lift the camera module from the adhesive on the LCD cover.

4. Remove the camera module from the LCD cover.

Removing the Inverter Board (LCD Only)

- 1. See “Removing the LCD Bezel” on page 90.
- 2. Remove the adhesive tape securing the inverter board cable to the LCD cover.

- 3. Remove one (1) screw from the inverter board.

Step	Size	Quantity	Screw Type
Inverter Board	M2.5*5	1	

- 4. Disconnect the inverter board cable going to the LCD panel.

-
5. Disconnect the inverter board cable going to the LVDS cable.

6. Lift the inverter board from the LCD cover.

Removing the LCD/LED Panel

- 1. See “Removing the LCD Bezel” on page 90.
- 2. Remove the four (4) securing screws from the LCD/LED panel.

Step	Size	Quantity	Screw Type
LCD/LED Panel	M2.5*5	4	

- 3. Remove the cable from the cable guide.

- 4. Lift the LCD/LED Panel clear of the module.

Removing the LCD Brackets

- 1. See "Removing the LCD/LED Panel" on page 94.
- 2. Remove the six (6) securing screws (three on each side) from the LCD brackets.

Step	Size	Quantity	Screw Type
LCD Brackets	M2*3	6	

- 3. Remove the LCD brackets by pulling away from the LCD panel.

Removing the LVDS cable

1. See "Removing the LCD/LED Panel" on page 94.
2. Remove the LVDS cable from the back of the panel.

LCD

LED

3. Peel back the mylar securing the LVDS cable.

LCD

LED

4. Disconnect the LVDS cable and remove it from the panel.

LCD

LED

Removing the Microphone Cable

1. See "Removing the LCD/LED Panel" on page 94.
2. Remove the adhesive securing the microphone cable and antenna.

3. Peel back the foil tabs and remove the microphone cable from the cable channel.

4. Lift the microphone set clear of the panel.

-
5. Lift the microphone set clear of the panel.

Removing the Antennas

1. See “Removing the LCD/LED Panel” on page 94.
2. Peel back the foil tabs securing the antenna to the LCD cover.

3. Remove the cable from the cable guides.

4. Using a flat plastic tool, pry the antenna assembly clear of the device.

-
5. Peel back the foil tabs securing the antenna to the LCD cover.

6. Remove the white antenna from the cable guides.

7. Using a flat plastic tool, pry the antenna assembly clear of the device.

LCD Module Reassembly Procedure

Replacing the Antennas

1. Adhere the white antenna assembly to the LCD cover.

2. Run the cable along the cable guides.

3. Fold over the foil tabs to secure the cable in place.

-
4. Adhere the black antenna assembly on the LCD cover.

5. Run the cable along the cable channel.

6. Fold over the foil tabs to secure the cable in place.

Replacing the Microphone Cable

1. Place the microphone set in the panel.

2. Run the cable along the cable channel.

IMPORTANT: Ensure that the cable runs between the callouts to avoid trapping when the panel is replaced in the LCD module.

3. Fold over the foil tabs and continue running the microphone cable along the cable channel indicated between the red callouts.

-
4. Replace the adhesive tape securing the microphone cable and the antenna together.

Replacing the LVDS Cable

1. Place the LVDS cable onto the back of the panel.

LCD

LED

2. Connect the LVDS cable to the panel.

LCD

LED

3. Replace the mylar to secure the LVDS cable.

LCD

LED

Replacing the LCD Brackets

1. Replace the LCD brackets to the LCD panel.

2. Replace the six (6) securing screws (three on each side) to the LCD panel brackets.

Step	Size	Quantity	Screw Type
LCD Brackets	M2*3	6	

Replacing the LCD/LED Panel

- 1. Place the LCD panel in the LCD cover.

- 2. Run the cable along the guide in the LCD cover as shown.

- 3. Replace the four (4) securing screws to the LCD panel.

Step	Size	Quantity	Screw Type
LCD/LED Panel	M2.5*5	4	

Replacing the Inverter Board (LCD Only)

1. Connect the inverter board cable going to the LVDS cable.

2. Connect the inverter board cable going to the LCD panel.

3. Place the inverter board onto the LCD cover and replace one (1) screw from the inverter board.

Step	Size	Quantity	Screw Type
Inverter Board	M2.5*5	1	

-
4. Replace the adhesive tape securing the inverter board cable to the LCD cover.

Replacing the Camera Module

1. Place the camera module in the LCD cover.

2. Connect the camera cable.

Replacing the LCD Bezel

1. Replace the bezel and press down until there are no gaps between the bezel and the LCD cover.

IMPORTANT: Ensure that the LCD cables pass through the hinge wells and are not trapped by the bezel.

2. Replace the two (2) screws and screw caps.

Step	Size	Quantity	Screw Type
LCD Bezel	M2.5*6	2	

Main Module Reassembly Procedure

Replacing the DC-IN Assembly

1. Place the DC-IN assembly into the lower cover.

2. Place the DC-IN cable into the lower cover as shown.

Replacing the LCD Assembly

- 1. Place the LCD assembly on the lower cover.

- 2. Replace four (4) screws to secure the LCD assembly.

Step	Size	Quantity	Screw Type
LCD Assembly	M2.5*8	4	

- 3. Place the black antenna cable into the cable guides.

Discrete

UMA

4. Place the white antenna cable into the cable guides.

5. Continue replacing the black and white antenna cables into the cable guides as shown

6. Place the microphone cable into the cable guides as shown.

Discrete

UMA

-
7. Replace the adhesive tape to secure the antennas to the lower cover.

Replacing the CPU

IMPORTANT: The CPU has a Pin1 locator that must be positioned corresponding to the marker on the CPU socket.

1. Place the CPU into the CPU socket as shown, taking note of the Pin1 locator.

2. Using a flat-bladed screw driver, rotate the CPU locking screw 180° clockwise to secure the CPU in place.

Replacing the Thermal Module

IMPORTANT: Apply a suitable thermal grease and ensure all heat pads are in place before replacing the thermal module.

The following thermal grease/pad types are approved for use:

CPU grease:

- Nano N302
- Honey well PCM45F-SP

VGA:

- Eapus PSX
- MASTRO B6

VRAM, CPU chock, or CPU mosfet:

- Laird T-flex340
- Eapus XR-HL

Southbridge:

- Laird T-flex340/Laird T-flex350
- Eapus XR-HL

Northbridge:

- Laird T-flex740/Laird T-flex350

1. Remove all traces of thermal grease from the CPU using a lint-free cloth or cotton swab and Isopropyl Alcohol, Acetone (1), or other approved cleaning agent.
2. Apply a small amount of thermal grease to the centre of the CPU—there is no need to spread the grease manually, the force used during the installation of the thermal module is sufficient.
3. Replace the fan to the heatsink.

NOTE: This procedure is only necessary for UMA models only.

-
4. Replace the adhesive tape to the thermal module to secure the fan to the heatsink.
NOTE: This procedure is only necessary for UMA models only.

5. Align the screw holes on the thermal module and mainboard then replace the module. Keep the module as level as possible to spread the thermal grease evenly.

Discrete

UMA

6. Replace the four (4) securing screws (in numerical order from screw 1 to screw 4) to secure the thermal module in place. In the discrete model, replace two (2) additional screws (in numerical order from screw 5 to 6).

Discrete

UMA

Step	Size	Quantity	Screw Type
Thermal Module	M1.98*3 (red callouts)	4	
(Discrete only)	M2.5*5(green callouts)	2	

7. Connect the fan cable.

Discrete

UMA

Replacing the Mainboard

1. Connect the Bluetooth to mainboard cable.

2. Apply the adhesive tape to secure the Bluetooth cable.

3. Place the mainboard on a clean, dust-free surface. Connect the power cable.

4. Place the mainboard in the chassis, left edge first to line up the I/O ports.

NOTE: Ensure the I/O ports are positioned correctly through the casing.

5. UMA: Replace the four (4) screws to secure the mainboard.
Discrete: Replace the one (1) screw to secure the mainboard.

Discrete

UMA

Step	Size	Quantity	Screw Type
Mainboard	M2.5*5 (red callouts)	1	
(UMA Only)	M2.5*5 (green callouts)	3	

-
6. Place the LVDS cable and the DC-IN cable into the cable guide.

7. Connect the LVDS cable to the mainboard.

8. Connect the microphone cable to the mainboard.

Replacing the ODD Connector Board (UMA Only)

1. Place the ODD connector board into the lower cover using the board pin.

2. Connect the ODD FFC to the mainboard and lock the connector.

Replacing the Bluetooth Board

1. Place the Bluetooth cable into the cable guides.

Discrete

UMA

2. Connect the Bluetooth cable to the Bluetooth module.

Discrete

UMA

3. Place the Bluetooth board onto the adhesive.

Discrete

UMA

Replacing the USB Board

- 1. Place the USB board in the chassis.

NOTE: The location of the bluetooth module may vary depending on your model.

- 2. Secure the one (1) screw on the USB board.

Step	Size	Quantity	Screw Type
USB Board	M2*3	1	

- 3. Adhere the FFC to the lower cover.

4. Connect the USB cable to the mainboard and lock the connector.

Replacing the Card Reader Board (Discrete Only)

- 1. Place the card reader board in the device.

- 2. Secure one (1) screw on the card reader board.

Step	Size	Quantity	Screw Type
Card Reader Board	M2*3	1	

- 3. Adhere the FFC to the lower cover.

4. Connect the card reader cable and lock the connector.

5. Replace both pieces of adhesive tape to secure the FCC to the lower cover.

Replacing the Touchpad FFC

1. Connect the touchpad FFC to the connector and lock the FFC locking latch.

2. Gently press on the FFC to adhere the cable to the upper cover

3. Replace the adhesive tape to secure the touchpad FFC.

Replacing the Power Board

NOTE: The power board may vary depending your model.

- 1. Pass the cable through the upper cover as shown. Turn the upper cover over and gently press down on the FFC to secure it to the upper cover.

- 2. Place the power board onto the upper cover.

- 3. Replace two (2) screws to secure the power board.

Step	Size	Quantity	Screw Type
Power Board	M2*3	2	

Replacing the Speaker Module

1. Place the speaker module onto the upper cover.

2. Place the speaker module cable into the cable guides as shown.

Replacing the Upper Cover

NOTE: The upper cover may vary in color depending on the model.

1. Place the upper cover on the lower cover as shown.

2. Connect the following three (3) cables to the mainboard.

3. Connect and lock the power board FFC (A).

4. Connect the speaker cable (B).

5. Connect and lock the touchpad FFC (C).

6. Replace the seven (7) screws to secure the upper cover as shown.

Step	Size	Quantity	Screw Type
Upper Cover	M2.5*5	7	

7. Turn the computer over. Replace the twelve (12) screws on the lower cover and four (4) screws in the battery bay.

Step	Size	Quantity	Screw Type
Lower Cover	M2.5*8 (red callout)	12	
	M2*3 (green callout)	4	

NOTE: The lower cover may vary depending on your model.

Replacing the RTC Battery (UMA Only)

1. Place the RTC battery into the mainboard connector.

Replacing the HDD Module

1. Place the HDD in the HDD carrier.

2. Replace the four (4) screws (two each side) to secure the carrier.

Step	Size	Quantity	Screw Type
HDD Carrier	M3*3	4	

3. Insert the HDD module, as indicated and lower it into place.

-
4. Slide the HDD module in the direction of the arrow to connect the interface.

Replacing the WLAN Module

1. Insert the WLAN Module into the WLAN socket.

2. Replace the one (1) screw to secure the module.

Step	Size	Quantity	Screw Type
WLAN Module	M2*3	1	

3. Connect the two (2) antenna cables to the module.

NOTE: The black cable connects to the upper terminal (MAIN) and the white cable to the lower terminal (MAIN).

Replacing the DIMM Modules

1. Insert the DIMM module in place.

2. Press down to lock the DIMM module in place.

3. Repeat steps for the second DIMM module if present.

Replacing the 3G Cover (Discrete Only)

1. Line up the left edge of the 3G cover with the device and lower into place.

2. Replace one (1) screw on the 3G cover.

Step	Size	Quantity	Screw Type
3G Cover	M2.5*8	1	

Replacing the Lower Logic Door

- 1. Replace the lower logic door by first lining up the bottom edge and lowering the door into place.

- 2. Replace two (2) screws to secure the lower logic door.

Step	Size	Quantity	Screw Type
Logic Lower Door	M2.5*8	2	

Replacing the ODD Module

1. Press the bezel into the tray, bottom edge first, to secure it to the ODD module.

2. Place the bracket on the ODD module.

3. Secure the ODD bracket with the two (2) screws.

Step	Size	Quantity	Screw Type
ODD Bracket	M2*3	2	

4. Push the ODD module into the ODD bay until it is flush with the casing.

5. Replace the one (1) screw to secure the module.

Step	Size	Quantity	Screw Type
ODD Module	M2.5*8	1	

Replacing the Keyboard

1. Place the keyboard face down on the palm rest.

2. Connect the keyboard FPC to the mainboard and close the locking latch to secure the cable in place.

3. Replace the keyboard by first lining up the bottom edge. Press down firmly to lock.

Replacing the SD Dummy Card

1. Insert the SD dummy card into the slot as shown.

2. Push until the card clicks into place and is flush with the casing.

Replacing the Battery

1. Slide and hold the battery release latch to the release position (1), insert the battery pack and press down (2).

2. Slide the battery lock in the direction shown to secure the battery in place.

Troubleshooting

Common Problems

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

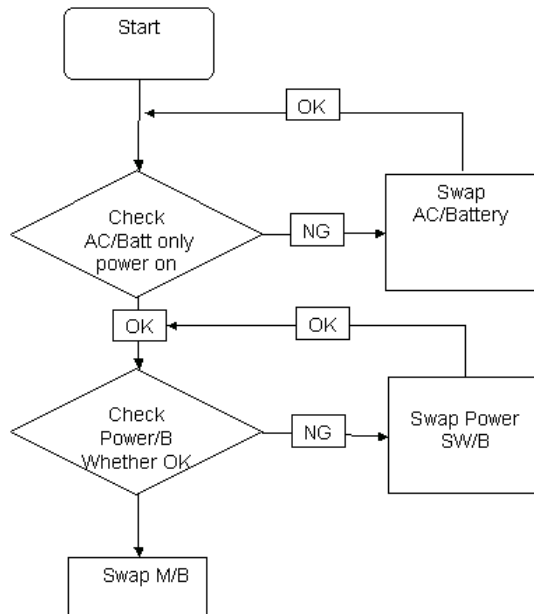

1. Obtain the failing symptoms in as much detail as possible.
2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
3. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go To
Power On Issue	Page 150
No Display Issue	Page 151
LCD Failure	Page 153
Internal Keyboard Failure	Page 153
Touchpad Failure	Page 154
Internal Speaker Failure	Page 154
ODD Failure	Page 157
WLAN Failure	Page 160
Thermal Unit Failure	Page 160
Other Functions Failure	Page 161
Intermittent Failures	Page 162
Undermined Failures	Page 162

4. If the Issue is still not resolved, see "Online Support Information" on page 245.

Power On Issue

If the system doesn't power on, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Computer Shutdown Intermittently

If the system powers off at intervals, perform the following actions one at a time to correct the problem.

1. Check the power cable is properly connected to the computer and the electrical outlet.
2. Remove any extension cables between the computer and the outlet.
3. Remove any surge protectors between the computer and the electrical outlet. Plug the computer directly into a known good electrical outlet.
4. Disconnect the power and open the casing to check the Thermal Unit (see "Thermal Unit Failure" on page 160) and fan airways are free of obstructions.
5. Remove all external and non-essential hardware connected to the computer that are not necessary to boot the computer to the failure point.
6. Remove any recently installed software.
7. If the Issue is still not resolved, see "Online Support Information" on page 245.

No Display Issue

If the **Display** doesn't work, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

No POST or Video

If the POST or video doesn't display, perform the following actions one at a time to correct the problem.

1. Make sure that the internal display is selected. On this notebook model, switching between the internal display and the external display is done by pressing **Fn+F5**. Reference Product pages for specific model procedures.
2. Make sure the computer has power by checking at least one of the following occurs:
 - Fans start up
 - Status LEDs light up

If there is no power, see "Power On Issue" on page 150.

3. Drain any stored power by removing the power cable and battery and holding down the power button for 10 seconds. Reconnect the power and reboot the computer.
4. Connect an external monitor to the computer and switch between the internal display and the external display by pressing **Fn+F5** (on this model).

If the POST or video appears on the external display, see "LCD Failure" on page 153.

5. Disconnect power and all external devices including port replicators or docking stations. Remove any memory cards and CD/DVD discs. Restart the computer.

If the computer boots correctly, add the devices one by one until the failure point is discovered.

6. Reseat the memory modules.
7. Remove the drives (see "Disassembly Process" on page 47).
8. If the Issue is still not resolved, see "Online Support Information" on page 245.

Abnormal Video Display

If video displays abnormally, perform the following actions one at a time to correct the problem.

1. Reboot the computer.
2. If permanent vertical/horizontal lines or dark spots display in the same location, the LCD is faulty and should be replaced. See “Disassembly Process” on page 47.
3. If extensive pixel damage is present (different colored spots in the same locations on the screen), the LCD is faulty and should be replaced. See “Disassembly Process” on page 47.
4. Adjust the brightness to its highest level. See the User Manual for instructions on adjusting settings.
NOTE: Ensure that the computer is not running on battery alone as this may reduce display brightness.
If the display is too dim at the highest brightness setting, the LCD is faulty and should be replaced. See “Disassembly Process” on page 47.
5. Check the display resolution is correctly configured:
 - a. Minimize or close all Windows.
 - b. If display size is only abnormal in an application, check the view settings and control/mouse wheel zoom feature in the application.
 - c. If desktop display resolution is not normal, right-click on the desktop and select **Personalize**→ **Display Settings**.
 - d. Click and drag the Resolution slider to the desired resolution.
 - e. Click **Apply** and check the display. Readjust if necessary.
6. Roll back the video driver to the previous version if updated.
7. Remove and reinstall the video driver.
8. Check the Device Manager to determine that:
 - The device is properly installed. There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
9. If the Issue is still not resolved, see “Online Support Information” on page 245.
10. Run the Windows Memory Diagnostic from the operating system DVD and follow the onscreen prompts.
11. If the Issue is still not resolved, see “Online Support Information” on page 245.

Random Loss of BIOS Settings

If the computer is experiencing intermittent loss of BIOS information, perform the following actions one at a time to correct the problem.

1. If the computer is more than one year old, replace the CMOS battery.
2. Run a complete virus scan using up-to-date software to ensure the computer is virus free.
3. If the computer is experiencing HDD or ODD BIOS information loss, disconnect and reconnect the power and data cables between devices.
If the BIOS settings are still lost, replace the cables.
4. If HDD information is missing from the BIOS, the drive may be defective and should be replaced.
5. Replace the Motherboard.
6. If the Issue is still not resolved, see “Online Support Information” on page 245.

LCD Failure

If the **LCD** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Built-In Keyboard Failure

If the built-in **Keyboard** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

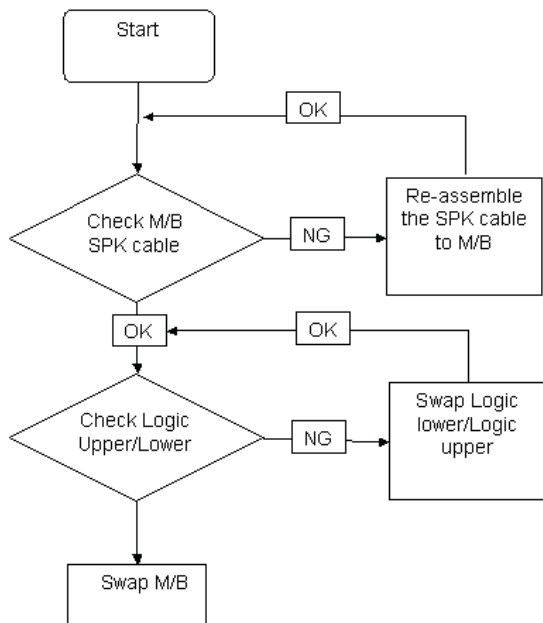

Touchpad Failure

If the **Touchpad** doesn't work, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Internal Speaker Failure

If the internal **Speakers** fail, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Sound Problems

If sound problems are experienced, perform the following actions one at a time to correct the problem.

1. Reboot the computer.
2. Navigate to **Start**→ **Control Panel**→ **System and Maintenance**→ **System**→ **Device Manager**. Check the Device Manager to determine that:
 - The device is properly installed.
 - There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
3. Roll back the audio driver to the previous version, if updated recently.
4. Remove and reinstall the audio driver.
5. Ensure that all volume controls are set mid range:
 - a. Click the volume icon on the taskbar and drag the slider to 50. Ensure that the volume is not muted.
 - b. Click Mixer to verify that other audio applications are set to 50 and not muted.
6. Navigate to **Start**→ **Control Panel**→ **Hardware and Sound**→ **Sound**. Ensure that Speakers are selected as the default audio device (green check mark).

NOTE: If Speakers does not show, right-click on the **Playback** tab and select **Show Disabled Devices** (clear by default).
7. Select Speakers and click **Configure** to start **Speaker Setup**. Follow the onscreen prompts to configure the speakers.
8. Remove and recently installed hardware or software.
9. Restore system and file settings from a known good date using **System Restore**.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.
10. Reinstall the Operating System.
11. If the Issue is still not resolved, see “Online Support Information” on page 245.

Microphone Problems

If internal or external **Microphones** do not operate correctly, perform the following actions one at a time to correct the problem.

1. Check that the microphone is enabled. Navigate to **Start**→ **Control Panel**→ **Hardware and Sound**→ **Sound** and select the **Recording** tab.
2. Right-click on the **Recording** tab and select **Show Disabled Devices** (clear by default).
3. The microphone appears on the **Recording** tab.
4. Right-click on the microphone and select **Enable**.
5. Select the microphone then click **Properties**. Select the **Levels** tab.
6. Increase the volume to the maximum setting and click **OK**.
7. Test the microphone hardware:
 - a. Select the microphone and click **Configure**.
 - b. Select **Set up microphone**.
 - c. Select the microphone type from the list and click **Next**.
 - d. Follow the onscreen prompts to complete the test.
8. If the Issue is still not resolved, see “Online Support Information” on page 245.

HDD Not Operating Correctly

If the **HDD** does not operate correctly, perform the following actions one at a time to correct the problem.

1. Disconnect all external devices.
2. Run a complete virus scan using up-to-date software to ensure the computer is virus free.
3. Run the Windows Vista Startup Repair Utility:
 - a. insert the Windows Vista Operating System DVD in the ODD and restart the computer.
 - b. When prompted, press any key to start to the operating system DVD.
 - c. The **Install Windows** screen displays. Click **Next**.
 - d. Select **Repair your computer**.
 - e. The **System Recovery Options** screen displays. Click **Next**.
 - f. Select the appropriate operating system, and click **Next**.

NOTE: Click **Load Drivers** if controller drives are required.

- g. Select **Startup Repair**.
- h. Startup Repair attempts to locate and resolve issues with the computer.
- i. When complete, click **Finish**.

If an issue is discovered, follow the onscreen information to resolve the problem.

4. Run the Windows Memory Diagnostic Tool. For more information see Windows Help and Support.
5. Restart the computer and press F2 to enter the BIOS Utility. Check the BIOS settings are correct and that CD/DVD drive is set as the first boot device on the Boot menu.
6. Ensure all cables and jumpers on the HDD and ODD are set correctly.
7. Remove any recently added hardware and associated software.
8. Run the Windows Disk Defragmenter. For more information see Windows Help and Support.
9. Run Windows Check Disk by entering **chkdsk /r** from a command prompt. For more information see Windows Help and Support.
10. Restore system and file settings from a known good date using **System Restore**.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.
11. Replace the HDD. See "Disassembly Process" on page 47.

ODD Failure

If the **ODD** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

ODD Not Operating Correctly

If the **ODD** exhibits any of the following symptoms it may be faulty:

- Audio CDs do not play when loaded
- DVDs do not play when loaded
- Blank discs do not burn correctly
- DVD or CD play breaks up or jumps
- Optical drive not found or not active:
 - Not shown in My Computer or the BIOS setup
 - LED does not flash when the computer starts up
 - The tray does not eject
- Access failure screen displays
- The ODD is noisy

Perform the following general solutions one at a time to correct the problem.

1. Reboot the computer and retry the operation.
2. Try an alternate disc.
3. Navigate to **Start** → **Computer**. Check that the ODD device is displayed in the **Devices with Removable Storage** panel.
4. Navigate to **Start** → **Control Panel** → **System and Maintenance** → **System** → **Device Manager**.

-
- a. Double-click **IDE ATA/ATAPI controllers**. If a device displays a down arrow, right-click on the device and click **Enable**.
 - b. Double-click **DVD/CD-ROM drives**. If the device displays a down arrow, right-click on the device and click **Enable**.
 - c. Check that there are no yellow exclamation marks against the items in **IDE ATA/ATAPI controllers**. If a device has an exclamation mark, right-click on the device and uninstall and reinstall the driver.
 - d. Check that there are no yellow exclamation marks against the items in **DVD/CD-ROM drives**. If a device has an exclamation mark, right-click on the device and uninstall and reinstall the driver.
 - e. If the exclamation marker is not removed from the item in the lists, try removing any recently installed software and retrying the operation.

Discs Do Not Play

If discs do not play when inserted in the drive, perform the following actions one at a time to correct the problem.

1. Check that the disc is correctly seated in the drive tray and that the label on the disc is visible.
2. Check that the media is clean and scratch free.
3. Try an alternate disc in the drive.
4. Ensure that **AutoPlay** is enabled:
 - a. Navigate to **Start**→ **Control Panel**→ **Hardware and Sound**→ **AutoPlay**.
 - b. Select **Use AutoPlay for all media and devices**.
 - c. In the Audio CD and DVD Movie fields, select the desired player from the drop down menu.
5. Check that the Regional Code is correct for the selected media:

IMPORTANT:Region can only be changed a limited number of times. After Changes remaining reaches zero, the region cannot be changed even Windows is reinstalled or the drive is moved to another computer.

- a. Navigate to **Start**→ **Control Panel**→ **System and Maintenance**→ **System**→ **Device Manager**.
- b. Double-click **DVD/CD-ROM drives**.
- c. Right-click **DVD drive** and click **Properties**, then click the **DVD Region** tab.
- d. Select the region suitable for the media inserted in the drive.

Discs Do Not Burn Properly

If discs can not be burned, perform the following actions one at a time to correct the problem.

1. Ensure that the default drive is record enabled:
 - a. Navigate to **Start**→ **Computer** and right-click the writable ODD icon. Click **Properties**.
 - b. Select the **Recording** tab. In the **Desktop disc recording** panel, select the writable ODD from the drop down list.
 - c. Click **OK**.
2. Ensure that the software used for burning discs is the factory default. If using different software, refer to the software's user manual.

Playback is Choppy

If playback is choppy or jumps, perform the following actions one at a time to correct the problem.

1. Check that system resources are not running low:
 - a. Try closing some applications.
 - b. Reboot and try the operation again.
2. Check that the ODD controller transfer mode is set to DMA:
 - a. Navigate to **Start**→ **Control Panel**→ **System and Maintenance**→ **System**→ **Device Manager**.

-
- b. Double-click **IDE ATA/ATAPI controllers**, then right-click ATA Device 0.
 - c. Click **Properties** and select the **Advanced Settings** tab. Ensure that the **Enable DMA** box is checked and click **OK**.
 - d. Repeat for the other ATA Devices shown if applicable.

Drive Not Detected

If Windows cannot detect the drive, perform the following actions one at a time to correct the problem.

1. Restart the computer and press F2 to enter the BIOS Utility.
2. Check that the drive is detected in the **ATAPI Model Name** field on the Information page.
NOTE: Check that the entry is identical to one of the ODDs specified in “Hardware Specifications and Configurations” on page 16.
3. Turn off the power and remove the cover to inspect the connections to the ODD. See “Disassembly Process” on page 47.
 - a. Check for broken connectors on the drive, motherboard, and cables.
 - b. Check for bent or broken pins on the drive, motherboard, and cable connections.
 - c. Try an alternate cable, if available. If the drive works with the new cable, the original cable should be replaced.
4. Reseat the drive ensuring and all cables are connected correctly.
5. Replace the ODD. See “Disassembly Process” on page 47.

Drive Read Failure

If discs cannot be read when inserted in the drive, perform the following actions one at a time to correct the problem.

1. Remove and clean the failed disc.
2. Retry reading the CD or DVD.
 - d. Test the drive using other discs.
 - e. Play a DVD movie
 - f. Listen to a music CD

If the ODD works properly with alternate discs, the original disc is probably defective and should be replaced.

3. Turn off the power and remove the cover to inspect the connections to the ODD. See “Disassembly Process” on page 47.
 - a. Check for broken connectors on the drive, motherboard, and cables.
 - b. Check for bent or broken pins on the drive, motherboard, and cable connections.
 - c. Try an alternate cable, if available. If the drive works with the new cable, the original cable should be replaced.
4. Replace the ODD. See “Disassembly Process” on page 47.

Wireless Function Failure

If the **WLAN** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Thermal Unit Failure

If the **Thermal Unit** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

External Mouse Failure

If an external **Mouse** fails, perform the following actions one at a time to correct the problem.

1. Try an alternative mouse.
2. If the mouse uses a wireless connection, insert new batteries and confirm there is a good connection. See the mouse user manual.
3. If the mouse uses a USB connection, try an alternate USB port.
4. Try an alternative program to verify mouse operation. Reinstall the program experiencing mouse failure.
5. Restart the computer.
6. Remove any recently added hardware and associated software.
7. Remove any recently added software and reboot.
8. Restore system and file settings from a known good date using **System Restore**.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.

9. Run the Event Viewer to check the events log for errors. For more information see Windows Help and Support.
10. Roll back the mouse driver to the previous version if updated recently.
11. Remove and reinstall the mouse driver.
12. Check the Device Manager to determine that:
 - The device is properly installed. There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
13. If the Issue is still not resolved, see "Online Support Information" on page 245.

Other Failures

If the CRT Switch, Dock, LAN Port, external MIC or Speakers, PCI Express Card, 5-in-1 Card Reader or Volume Wheel fail, perform the following general steps to correct the problem. Do not replace a non-defective FRUs:

1. Check Drive whether is OK.
2. Check Test Fixture is ok.
3. Swap M/B to Try.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
2. If no error is detected, do not replace any FRU.
3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See “Power On Issue” on page 150.):

1. Power-off the computer.
2. Visually check them for damage. If any problems are found, replace the FRU.
3. Remove or disconnect all of the following devices:
 - Non-Acer devices
 - Printer, mouse, and other external devices
 - Battery pack
 - Hard disk drive
 - DIMM
 - CD-ROM/Diskette drive Module
 - PC Cards
4. Power-on the computer.
5. Determine if the problem has changed.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System board
 - LCD assembly

Post Codes

These tables describe the POST codes and descriptions during the POST.

Post Code Range

Phase	POST Code Range
SEC	0x01 - 0x0F
PEI	0x70 - 0x9F
DXE	0x40 - 0x6F
BDS	0x10 - 0x3F
SMM	0xA0 - 0xBF
S3	0xC0 - 0xCF
ASL	0x51 – 0x55 0xE1 – 0xE4
PostBDS	0xF9 – 0xFE
Reserved	0xD8 – 0xE0 0xE5 – 0xF8

SEC Phase POST Code Table

Functionality Name (Include\ PostCode.h)	Phase	Post Code	Description
SEC_SYSTEM_POWER_ON	SEC	1	CPU power on and switch to Protected mode
SEC_BEFORE_MICROCODE_PATCH	SEC	2	Patching CPU microcode
SEC_AFTER_MICROCODE_PATCH	SEC	3	Setup Cache as RAM
SEC_SETUP_CAR_OK	SEC	7	Cache as RAM test
SEC_GO_TO_SECSTARTUP	SEC	9	Setup BIOS ROM cache

Clearing Password Check and BIOS Recovery

This section provides you with the standard operating procedures of clearing password and BIOS recovery for the Aspire AS5552/AS5552G. The machine provides one Hardware Open Gap on main board for clearing password check, and one Hotkey for enabling BIOS Recovery.

Clearing Password Check

Steps for Clearing BIOS Password Check

If users set BIOS Password (Supervisor Password and/or User Password) for a security reason, BIOS will ask the password during systems POST or when systems enter to BIOS Setup menu. However, once it is necessary to bypass the password check, users need to short the HW Gap to clear the password by the following steps:

- 1. Power Off the system, and remove HDD, AC and Battery from the machine.
- 2. Disconnect the RTC Battery cable and locate the R334 jumper.
- 3. Use an electric conductivity tool to short the two points of the HW Gap.
- 4. Plug in AC, keeping the HW Gap shorted. Press Power Button until BIOS POST is finished, then remove the tool from the HW Gap.
- 5. Restart the system. Press **F2** key to enter BIOS Setup menu.
- 6. If there is no Password request, BIOS Password is cleared. Otherwise, please follow the steps and try again.

NOTE: These steps are only for clearing BIOS Password (Supervisor Password and User Password).

Clear CMOS Jumper

Item	Description
R334	Clear CMOS Jumper

BIOS Recovery by Crisis Disk

BIOS Recovery Boot Block:

BIOS Recovery Boot Block is a special block of BIOS. It is used to boot up the system with minimum BIOS initialization. Users can enable this feature to restore the BIOS firmware to a successful one once the previous BIOS flashing process failed.

BIOS Recovery Hotkey:

The system provides a function hotkey: **Fn+Esc**, for enable BIOS Recovery process when system is powered on during BIOS POST. To use this function, it is strongly recommended to have the AC adapter and Battery present. If this function is enabled, the system will force the BIOS to enter a special BIOS block, called Boot Block.

Steps for BIOS Recovery from USB Storage:

Before doing this, prepare the Crisis USB key. The Crisis USB key could be made by executing the Crisis Disk program in another system with Windows XP OS.

Follow the steps below:

1. Format the USB storage disk using the Fast Format option.
2. Save ROM file (file name: **BIOS.FD**) to the root directory of USB storage. Make sure that there is no other BIOS file saved in the same directory.
3. Plug USB storage into USB port.
4. Press **Fn + ESC** button then plug in AC power.

The Power button flashes once.

5. Press **Power** button to initiate system CRISIS mode.

When CRISIS is complete, the system auto restarts with a workable BIOS.

6. Update the latest version BIOS for this machine by regular BIOS flashing process.

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of Aspire AS5552/AS5552G. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows® 7 environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the Aspire AS5552/AS5552G Compatibility Test Report released by the Acer Mobile System Testing Department.

Microsoft® Windows® 7 Environment Test

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- Bios updates
- Software utilities
- Spare parts lists
- TABs (Technical Announcement Bulletin)

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material.

Also contained on this website are:

- Detailed information on Acer's International Traveler's Warranty (ITW)
- Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.

A

- AFLASH Utility 37
- Antennas
 - Removing 97, 99
 - Replacing 101

B

- Battery
 - Replacing 147
- Battery Pack
 - Removing 49
- BIOS Utility 29–37
 - Exit 36
 - Navigating 29
 - Onboard Device Configuration 33
 - Save and Exit 36
 - System Security 36
- Bluetooth Module (Discrete)
 - Removing 75
- Board Layout
 - Top View 167, 169
- brightness
 - hotkeys 15

C

- Camera Module
 - Removing 91, 92, 108
 - Replacing 107, 110, 113
- Cardreader Board
 - Removing 71
- Common Problems 150
- computer
 - on indicator 11
- CPU
 - Removing 84
 - Replacing 116

D

- DIMM Modules
 - Replacing 140
- Display 6
- display
 - hotkeys 15

E

- EasyTouch Failure 160
- External Module Disassembly
 - Flowchart 48

F

- Features 1
- Flash Utility 37
- FRU (Field Replaceable Unit) List 177

H

- Hard Disk Drive
 - Removing 60
 - Replacing 137
- HDTV Switch Failure 161
- Hibernation mode
 - hotkey 15
- Hot Keys 13

I

- Indicators 11
- Intermittent Problems 162
- Internal Microphone Failure 155
- Internal Speaker Failure 154

J

- Jumper and Connector Locations 167

K

- Keyboard
 - Removing 51
 - Replacing 145
- Keyboard Failure 153

L

- LCD Bezel
 - Replacing 111
- LCD Bracket
 - Replacing 106
- LCD Brackets
 - Removing 95, 96

- Replacing 103
- LCD Cable
 - Replacing 103
- LCD Failure 153
- LCD Module Disassembly
 - Flowchart 89
- LCD Module Reassembly Procedure 101
- LCD Panel
 - Removing 94
 - Replacing 103
- LVDS Cable
 - Replacing 105

M

- Main Unit Disassembly
 - Flowchart 63
- Mainboard
 - Removing 78
 - Replacing 120
- media access
 - on indicator 11
- Memory
 - Replacing 140
- Memory Check 150
- Model Definition 200

N

- No Display Issue 151

O

- ODD Connector Board
 - Removing 77
 - Replacing 123
- ODD Failure 157
- Online Support Information 245
- Optical Disk Drive
 - Replacing 142, 143
- Optical Drive Module
 - Removing 53

P

- Panel 8
- PC Card 11
- Power On Failure 150

R

- Replacing 130
- Right Speaker Module
 - Removing 68
 - Replacing 130

S

- SD Dummy Card
 - Removing 50
 - Replacing 146
- Speaker Module
 - Replacing 131
- Speakers 130
 - Removing 68
- System
 - Block Diagram 6

T

- Test Compatible Components 239
- Thermal Module
 - Removing 82
 - Replacing 117
- Thermal Unit Failure 160
- TouchPad Bracket
 - Replacing 129
- TouchPad Failure 154
- Touchpad FFC
 - Removing 70
- Troubleshooting
 - Built-in KB Failure 153
 - EasyTouch Buttons 160
 - HDTV Switch 161
 - Internal Microphone 155
 - Internal Speakers 154
 - LCD Failure 153
 - No Display 151
 - ODD 157
 - Other Failures 161
 - Power On 150
 - Thermal Unit 160
 - TouchPad 154
 - WLAN 160

U

- Undetermined Problems 162
- Upper Cover

- Removing 64
- Replacing 132
- USB Board
 - Removing 73
- utility
 - BIOS 29–37

W

- Windows 2000 Environment Test 240
- Wireless Function Failure 160
- WLAN Module
 - Removing 58, 62, 136
 - Replacing 139
